Inspector's Reasoning and Conclusions

Implementation – 503

14.1.1 The objector makes a number of points about the role of development control and supplementary planning guidance in the implementation of the Plan. No specific modification to Chapter 14 is sought. Whilst I recognise the importance of consultation and the provision of information in the development control process, I consider that these matters do not require any modification to the Plan.

RECOMMENDATION

14.1/1 Do not make any modification in response to the objection.
