

EST LAA workshop Emissions Data Pack

Headline figures

	Total emissions (kt CO2 2005)	Per capita emissions (tonnes per capita)	National average (tonnes per capita)
Herefordshire	1689	9.4	7.9

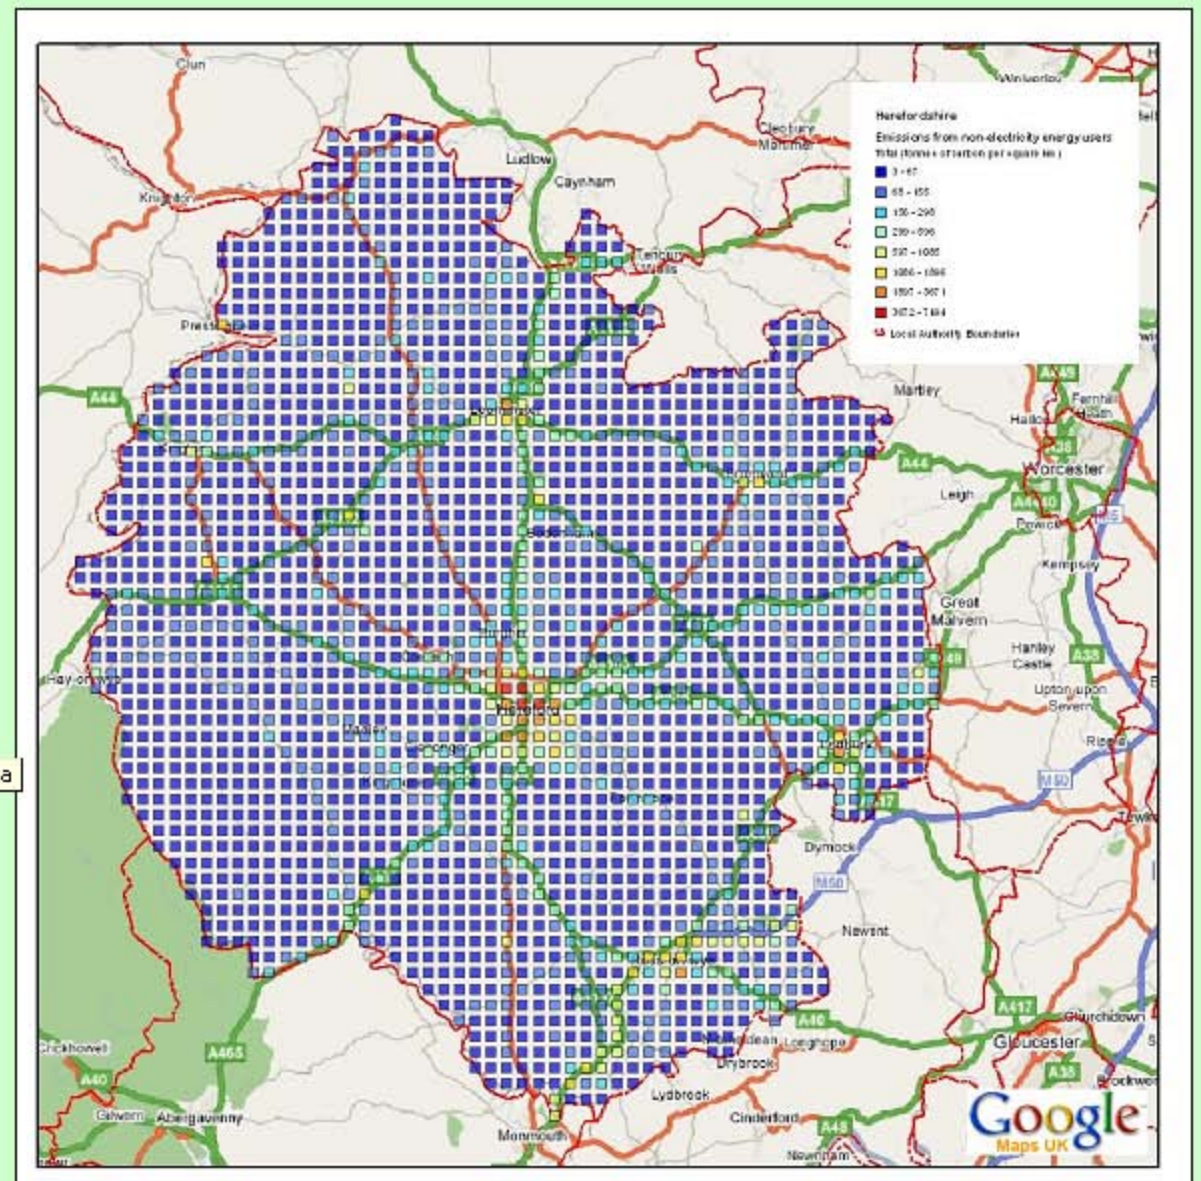

Sector totals

Industry & Commercial	643
Domestic	436
Road transport	611

Data pack contents

- Detailed breakdown of emissions (data and graph)
- List of measures included in savings estimates
- Estimates of potential savings by measure: 2010, 2020 (graphs and data)
- Detailed local energy consumption data from **BERR**

This map is generated from the NAEI 1km resolution emissions data. It shows emissions from energy users. The data are available from www.naei.org.uk/datachunk.php?f_datachunk_id=180
Also provided here in sheet 'Herefordshire NAEI 1km emissions'
An explanation of the dataset is available at www.naei.org.uk/datachunk.php?f_datachunk_id=181
