FOREWORD

Cllr Brian Wilcox,
Cabinet Member for
Highways and
Transportation

Welcome to Herefordshire's second Local Transport Plan which covers the period 2006/7 to 2010/11. This Plan has been developed to help us work towards our vision of an integrated and sustainable transport system that supports the County's sustainable economic growth and provides for greater social inclusion.

We have set out a Strategy which is focused on effective delivery and builds upon the improvements made during the first Local Transport Plan period from 2001/02 to 2005/6.

We are proud that our progress so far has resulted in the Council being awarded Centre of Excellence status for Local Transport Delivery and will strive to continue to improve and share our best practice and learn from others. We are dedicated to seeking innovative solutions which improve access for our community and get best value for money.

We are interested in your views on this Local Transport Plan and I would encourage you to visit our website for up to date information on transport improvements across the County. You can visit the website at www.herefordshire.gov.uk and feedback comments online.
