

Things to remember when reporting on BARS....

ACTION PLANS

Plan Overview report

This covers how the general delivery of the whole plan is going. Summary, Progress, Constraints to delivery.

Target Progress report

This is the wordy report that is needed to explain how the general progress of this specific target is going. This is needed to keep track of progress of target delivery

Target Goal

This is the numeric reporting - how much of the target goal has been delivered. Click on the red button in Targets goal. 

Action Progress report

This is the wordy report that is needed to explain how the general progress of this specific action is going. Don't forget to update the action status! You can also upload any reports or publications that may complement information on delivery. If you do this, you can tag them as confidential if it is of a sensitive nature.

Action Goal

This is the numeric reporting - how much of the action goal has been delivered. Click on the red button in action goal. 

SPECIES & HABITATS

Status, Trends, & Losses

This feeds into UK system. From this we can identify delivery problems, successes, as well as getting a national picture of how successful the BAP process is for both species and habitats.

Most plans have been linked to UK BAP action plans, so inputting locally will give a clearer national overview (& putting Herefordshire on the biodiversity map!). By NOT reporting, this excludes Herefordshire from the overall national picture.
