

Wye Valley Walk – Temporary Diversion

The published route of the Wye Valley Walk is closed where the path crosses the river at Lydbrook Rail Bridge (Grid Reference SO 58713 17653) due to its unsafe condition.

As a consequence, walkers should remain on the same side of the river throughout the length of the diversion which is shown on the plan (a route is available on both sides).

We apologise for any inconvenience this may cause.
