Stretton Grandison, Eggleton, Canon Frome and Castle Frome

Neighbourhood Development Plan 2020 - 2031

# **Basic Conditions Statement**

(Paragraph 8(2) of Schedule 4B to the Town and Country Planning Act 1990)

Prepared by Stretton Grandison Group Neighbourhood Plan Working Group On behalf of Stretton Grandison Group Parish Council March 2020

# 1.0 Introduction

1.1 Planning Practice Guidance (Paragraph: 065 Reference ID: 41-065-20140306)<sup>1</sup> sets out that only a draft Neighbourhood Plan or Order that meets each of a set of basic conditions can be put to a referendum and be made. The basic conditions are set out in paragraph 8(2) of Schedule 4B to the Town and Country Planning Act 1990 as applied to neighbourhood plans by section 38A of the Planning and Compulsory Purchase Act 2004. The basic conditions are:

a. having regard to national policies and advice contained in guidance issued by the Secretary of State it is appropriate to make the order (or neighbourhood plan).

b. having special regard to the desirability of preserving any listed building or its setting or any features of special architectural or historic interest that it possesses, it is appropriate to make the order. This applies only to Orders.

c. having special regard to the desirability of preserving or enhancing the character or appearance of any conservation area, it is appropriate to make the order. This applies only to Orders.

*d.* the making of the order (or neighbourhood plan) contributes to the achievement of sustainable development.

e. the making of the order (or neighbourhood plan) is in general conformity with the strategic policies contained in the development plan for the area of the authority (or any part of that area).

*f.* the making of the order (or neighbourhood plan) does not breach, and is otherwise compatible with, EU obligations.

g. prescribed conditions are met in relation to the Order (or plan) and prescribed matters have been complied with in connection with the proposal for the order (or neighbourhood plan).

1.2 This Basic Conditions Statement sets out how the Stretton Grandison Group NDP has been prepared to meet the basic conditions. It has been prepared as a supporting document for consideration by the NDP independent Examiner.

<sup>&</sup>lt;sup>1</sup> <u>https://www.gov.uk/guidance/neighbourhood-planning--2#basic-conditions-for-neighbourhood-plan-to-referendum</u>

# 2.0 Legal Requirements

#### 2.1 The Submission Plan is being submitted by a qualifying body

This Submission Plan is being submitted by a qualifying body, namely Stretton Grandison Group Parish Council.

#### 2.2 What is being proposed is a neighbourhood development plan

The plan being proposed relates to planning matters (the use and development of land) and has been prepared in accordance with the statutory requirements and processes set out in the Town and Country Planning Act 1990 (as amended by the Localism Act 2011) and the Neighbourhood Planning Regulations 2012.

### 2.3 The proposed Neighbourhood Plan states the period for which it is to have effect

The proposed Neighbourhood Plan states the period for which it is to have effect. That period is from 2020 to 2031 (from the current year and referring to the same period as the adopted Herefordshire Local Plan Core Strategy 2011 - 2031).

#### 2.4 The policies do not relate to excluded development

The Neighbourhood Plan proposal does not deal with county matters (mineral extraction and waste development), nationally significant infrastructure or any other matters set out in Section 61K of the Town and Country Planning Act 1990.

# 2.5 The proposed Neighbourhood Plan does not relate to more than one neighbourhood area and there are no other neighbourhood development plans in place within the neighbourhood area.

The Neighbourhood Plan proposal relates to the designated Stretton Grandison Group Neighbourhood Area and to no other area. There are no other Neighbourhood Plans relating to that neighbourhood area. The Designated Neighbourhood Plan Area has the same boundary as that of the Group Parish at the time of the designation and is shown on Map 1 in the NDP.

# 3.0 Basic Conditions

# 3.1 a. Having regard to national policies and advice contained in guidance issued by the Secretary of State, it is appropriate to make the plan

The Stretton Grandison Group Neighbourhood Development Plan has been prepared having appropriate regard to the policies set out in the revised National Planning Policy Framework (NPPF, February 2019)<sup>2</sup>.

#### 2. Achieving Sustainable Development

Paragraph 1 of the NPPF explains that '*The National Planning Policy Framework sets out the Government's planning policies for England and how these should be applied*.' Paragraph 7 sets out that '*The purpose of the planning system is to contribute to the achievement of sustainable development*.' The planning system has 3 overarching objectives to achieve sustainable development (paragraph 8): an economic objective, a social objective and an environmental objective. These should be delivered through the preparation and implementation of plans (paragraph 9).

Table 1 sets out how the Stretton Grandison Group NDP delivers the 3 overarching Objectives:

#### Table 1 Delivering Sustainable Development

NPPF Overarching Objectives	Stretton Grandison Group NDP Policies and Proposals
a) <b>an economic objective</b> – to help build a strong, responsive and competitive economy, by ensuring that sufficient land of the right types is available in the right places and at the right time to support growth, innovation and improved productivity; and by identifying and coordinating the provision of infrastructure;	Stretton Grandison NDP recognises the area's location within a rural area of Herefordshire where the existing local economy is focussed on rural businesses such as agriculture and food production and the visitor economy.
	The NDP's Objectives related to the Economy are:
	- ECO1. To support the sensitive conversion of redundant farm
	buildings such as for holiday accommodation, cafes and farm shops to
	create more local employment opportunities.

<sup>&</sup>lt;sup>2</sup> https://www.gov.uk/government/publications/national-planning-policy-framework--2

	This will be delivered through NDP <b>Policy SG9</b> Re-Use of Former Agricultural Buildings for Local Economic Development which supports proposals for the small scale and sensitive conversion of redundant former agricultural buildings for suitable business uses such as offices, workshops, cafes, visitor accommodation and live / work units subject to local criteria.
	- <b>ECO2</b> . To support investment in local infrastructure including broadband and transport.
	This will be delivered through several NDP Policies. NDP <b>Policy SG1</b> sets out that development should include provision for the integration of information and communication technologies such as broadband and access to mobile telephone networks. <b>Policy SG8</b> Design Principles - Promoting High Quality and Sustainable Design which sets out that development should aim to promote walking and cycling and public transport by linking to existing routes and facilities where possible and including suitable storage provision for bicycles and proposals should, wherever appropriate, include traffic calming measures. <b>Policy SG9</b> Re-Use of Former Agricultural Buildings for Local Economic Development sets out that development proposals should enhance road safety in the designated area. - <b>ECO3</b> . To encourage the use of renewable energy schemes This will be delivered through <b>Policy SG11</b> Community-Led Renewable Energy Schemes.
b) <b>a social objective</b> –to support strong, vibrant and healthy communities, by ensuring that a sufficient number and range of homes can be provided to meet the needs of present and future generations; and by fostering a well-designed and safe built environment, with accessible services and open spaces that reflect current and future	Stretton Grandison Group NDP recognises the importance of contributing to the social sustainability of the local community. The <b>NDP's housing objectives</b> are:

needs and support communities' health, social and cultural well-being; and	<ul> <li>HO1. To identify the distribution and scale of housing growth in each of the identified settlements in the Core Strategy.</li> <li>HO2. To work closely with neighbouring parishes to promote a joint approach to growth at Fromes Hill and Lower Eggleton.</li> <li>HO3. To identify a range of suitable sites through a Call for Sites and Site Assessment process.</li> <li>HO4. To support a suitable and appropriate mix of house types, tenures and sizes in both new development and residential conversions across the Group Parish.</li> </ul>
	The NDP area includes two settlements which are identified in the Herefordshire Local Plan Core Strategy 2011 - 2031 as settlements which will be the main focus of proportionate housing development (Lower Eggleton and Fromes Hill (parts only)) and three settlements where proportionate housing is appropriate (Stretton Grandison, Canon Frome and Eggleton) (Figs 4.14 and 4.15 in the Core Strategy).
	NDP <b>Policy SG1</b> Settlement Boundaries identifies settlement boundaries for all these settlements on Policies Maps.
	NDP <b>Policy SG2</b> Housing Sites identifies 4 proposed housing sites (2 in Stretton Grandison and 2 in Canon Frome).
	NDP <b>Policy SG3</b> Affordable Housing at Canon Frome Court (up to 8 units) supports affordable housing provision at Canon Frome Court both for conversion and new build schemes.
	NDP <b>Policy SG4</b> Housing Mix sets out how housing developments should respond to local needs for medium sized family housing (up to three bedrooms), starter homes of one or two bedrooms, housing designed for older people and those with particular needs such as mobility impairments or other disabilities.

	All housing policies and site allocations were prepared through an extensive process local community consultation and engagement.
c) <b>an environmental objective</b> - to contribute to protecting and enhancing our natural, built and historic environment; including making effective use of land, helping to improve biodiversity, using natural resources prudently, minimising waste and pollution, and mitigating and adapting to climate change, including moving to a low carbon economy.	Stretton Grandison Group NDP has a strong emphasis on environmental sustainability which reflects its location within a rural area and the area's many built and natural heritage assets. <b>Objectives for the Environment</b> are:
	<ul> <li>- ENO1. To conserve and protect the park landscapes of Homend Park and Canon Frome Court, including individual veteran trees and avenues of trees.</li> <li>- ENO2. To protect and enhance local natural environmental assets such as wildlife, hedgerows, water courses and ponds, traditional orchards, ancient woodlands, the line of the old canal and important views such as to Woolhope Dome.</li> </ul>
	These will be delivered through NDP <b>Policies SG5</b> , <b>SG6</b> and <b>SG7</b> . <b>Policy</b> <b>SG5</b> Protecting Local Landscape Character and Wildlife requires development proposals to respond positively to the characteristics of the local Landscape Type and to incorporate appropriate local species and landscape designs to enhance local biodiversity. The Policy identifies various features which contribute towards the special landscape character of the area and which are important to local people and requires development to protect and enhance these features. Lighting schemes should protect the dark skies. <b>Policy SG6</b>
	Design Guidelines for Stretton Grandison Conservation Area requires development proposals to be sensitive to the special character of the area and to address various design criteria. <b>Policy SG7</b> Design Principles - Protecting and Enhancing Heritage and Local Character identifies those local characteristics of the built environment which contribute towards local character and sets out how development should be sensitive to local character and context.

The NDP includes several policies which require development to maximise resource efficiency and minimise carbon emissions which contribute towards climate change. <b>Policy SG1</b> supports development
where schemes incorporate modern and innovative designs including
sustainable design technologies to maximise resource and energy
efficiency and designs are sensitive to local context and heritage. <b>Policy SG 8</b> sets out that contemporary designs and modern
architectural approaches, including the use of innovative construction
techniques to maximise resource and energy efficiency will be
supported where they are of outstanding or innovative design and
where they clearly demonstrate that they are appropriate to their
context. In addition the Policy notes that small scale domestic
renewable energy schemes such as solar panels, solar water heating
and ground source heat pumps will be supported provided that
schemes are sited and designed to be unobtrusive. <b>Policy SG11</b> Community-Led Renewable Energy Schemes also supports appropriate
community led projects which would provide low carbon alternatives.
<b>Policy SG8</b> also promotes use of more sustainable transport options
such as walking and cycling.
- ENO3. To ensure development is guided towards areas of lowest
flood risk and to promote designs and layout which do not exacerbate
flood risk eg from surface water. This will be delivered through <b>Policy SG12</b> Reducing Flood Risk.
- ENO4. To ensure new agricultural development such as poly tunnels
and large agricultural buildings are designed and sited sensitively
within the landscape.
Policies SG9 and SG10 have all been prepared to help ensure that
development in the rural area which is related to the rural economy is
sensitive to the local context. <b>Policy SG9</b> Re-Use of Former Agricultural Buildings for Local Economic Development supports sensitive
conversions of redundant former agricultural buildings for suitable
conversions of redundant former agricultural buildings for suitable

business uses and requires proposals to consider access, parking,
pollution and protection of amenity and road safety. Policy SG10 New
Agricultural Buildings and Poly Tunnels requires schemes to consider
landscape impacts, noise, odour and light and to incorporate energy
and resource efficiency measures and minimise light pollution to
protect dark skies.

The presumption in favour of sustainable development is explained in relation to plan making in paragraph 11:

11. Plans and decisions should apply a presumption in favour of sustainable development. For **plan-making** this means that:

a) plans should positively seek opportunities to meet the development needs of their area, and be sufficiently flexible to adapt to rapid change;

*b)* strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas<sup>5</sup>, unless:

*i.* the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area<sup>6</sup>; or

*ii. any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole.* 

The Stretton Grandison Group NDP takes a positive and balanced approach to development, seeking to meet the indicative housing target set out in the Herefordshire Local Plan Core Strategy whilst protecting the sensitive character of the local natural and built environment.

Paragraph 13 explains that the application of the presumption has implications for the way communities engage in neighbourhood planning. Neighbourhood plans should support the delivery of strategic policies contained in local plans or spatial development strategies; and should shape and direct development that is outside of these strategic policies.

### 3. Plan Making

In Section 3 Plan Making, the NPPF sets out that 6 principles that plans should address. Table 2 sets out how the Stretton Grandison Group NDP addresses each of these in turn.

## Table 2 Plan Making

NPPF Plan Making	Stretton Grandison Group NDP		
a) be prepared with the objective of contributing to the achievement of sustainable development;	The NDP has been prepared to contribute to sustainable development; Table 1 above sets out how the Plan's objectives, policies and proposals address economic, social and environmental objectives.		
b) be prepared positively, in a way that is aspirational but deliverable;	The NDP has been prepared positively. The Parish Council, through the Steering Group, has worked hard to ensure policies are positively worded to 'support' and 'encourage' suitable and appropriate development.		
	The design policies in the NDP set out locally appropriate criteria which reflect the designated area's location in a rural area of Herefordshire.		
	The policies have been prepared over a long period of time and though several stages of informal consultation and engagement. The work on the NDP has been led by a Steering Group of local residents and parish councillors with the support of officers from Herefordshire Council and independent planning consultants.		
c) be shaped by early, proportionate and effective engagement between plan-makers and communities, local organisations, businesses, infrastructure providers and operators and statutory consultees;	Local residents have helped to shape the policies, many of whom have a detailed knowledge of the area and its intrinsic character and special qualities and are passionate about protecting them.		
	All the policies have been prepared through an extensive and thorough approach to community engagement. This has led to a relatively high proportion of local residents aking part in questionnaires and surveys as the Plan has moved forward through the process.		
	The accompanying Consultation Statement sets out the details of the extensive, wide ranging and multiple community consultation and		

d) contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals;	<ul> <li>engagement activities which have been undertaken since 2015 at all stages of the Plan's preparation. Briefly this has included:</li> <li>Setting up a Steering Group of interested local residents and Parish Councillors to oversee the preparation of the NDP on behalf of the Parish Council in May 2016;</li> <li>An Issues and Options document and accompanying Residents' Questionnaire were prepared and published for local informal consultation in February 2017;</li> <li>A Call for Sites from January - March 2018;</li> <li>Preparation of a First Draft Plan with Site Options and publication for informal consultation in June 2019;</li> <li>Formal Regulation 14 Public Consultation on the Draft NDP from November to December 2019, when statutory consultees (consultation bodies) were invited to respond.</li> <li>Consultations were promoted using local newsletters, the Parish Council's website and hand delivery of questionnaires to all households in the Parish by members of the Steering Group. Drop In events were held at key stages.</li> <li>At each consultation stage representations have been considered carefully and appropriate amendments to the NDP made.</li> <li>The NDP policies and proposals have been prepared by a Steering Group on behalf of the Parish Council, with support from a planning consultant and planning officers at Herefordshire Council.</li> <li>Amendments have been made at key stages to improve the clarity and reduce ambiguity, but it is understood that the Examiner is likely to recommend further changes to wording following the examination process.</li> </ul>
e) be accessible through the use of digital tools to assist public involvement and policy presentation; and	Updates and documents have been provided on the NDP website at all stages of plan preparation.

	Responses by email were invited at informal and formal consultation stages.
f) serve a clear purpose, avoiding unnecessary duplication of policies that apply to a particular area (including policies in this Framework, where relevant).	The NDP has been amended and updated to reduce duplication with policies in the Herefordshire Local Plan Core Strategy and duplication with national policies.

#### The Plan Making Framework

Paragraph 18 sets out that policies to address non-strategic matters should be included in local plans that contain both strategic and non-strategic policies, and/or in local or neighbourhood plans that contain just non-strategic policies. The Stretton Grandison Group NDP contains non-strategic planning policies and proposals that add local detail and value to strategic policies in the Herefordshire Local Plan Core Strategy. The supporting text for the NDP policies refers to the relevant strategic policies.

#### **Non-strategic policies**

Paragraph 29 advises that neighbourhood planning gives communities the power to develop a shared vision for their area. Neighbourhood plans can shape, direct and help to deliver sustainable development, by influencing local planning decisions as part of the statutory development plan.

Neighbourhood plans should not promote less development than set out in the strategic policies for the area, or undermine those strategic policies. Stretton Grandison Group NDP supports development in line with Local Plan Core Strategy Policy RA1 - Rural housing distribution which sets out a housing growth target for the Ledbury rural housing market area of 14% over the Plan period up to 2031. Taking into account existing commitments and completions of new housing since 2011, the NDP is required to support the provision of a least 14 new homes up to 2031. It does this though proposed site allocations and policies which support appropriate development within identified settlement boundaries.

Policy RA2 - Housing in Settlements outside Hereford and the market towns identifies five settlements in the Group Parish / NDP area where development is considered appropriate. The NDP responds positively to this, noting that Lower Eggleton and Fromes Hill (both on the edge of the neighbourhood area, and partly within other parishes) are identified as settlements which will be the main focus of proportionate housing development (Figure 4.14 in the Core Strategy), and Stretton Grandison, Canon Frome and Eggleton are identified as other settlements where proportionate housing is appropriate (in Figure 4.15). In order to be in 'general conformity' with the Core Strategy, new housing development in the parish should be concentrated in these identified settlements.

Paragraph 30 goes on to say that once a neighbourhood plan has been brought into force, the policies it contains take precedence over existing non-strategic policies in a local plan covering the neighbourhood area, where they are in conflict; unless they are superseded by strategic or non-strategic policies that are adopted subsequently.

#### 5. Delivering a sufficient supply of homes

Paragraph 65 sets out that strategic policies should also set out a housing requirement for designated neighbourhood areas which reflects the overall strategy for the pattern and scale of development and any relevant allocations. The NDP has been prepared in the context of Herefordshire Local Plan Core Strategy Policies RA1 and RA2 and demonstrates that the requirement of 14 dwellings (14% growth target) will be met through existing commitments, proposed housing sites and windfall development.

The designated area is located within a rural area. Paragraph 78 advises that to promote sustainable development in rural areas, housing should be located where it will enhance or maintain the vitality of rural communities. The NDP supports this principle by guiding new development proposals to within the settlement boundaries of the settlements identified for growth in the Core Strategy.

#### 6. Building a strong, competitive economy

Paragraph 83 advises that in rural areas planning policies should enable a) the sustainable growth and expansion of all types of business in rural areas, both through conversion of existing buildings and well-designed new buildings; b) the development and diversification of agricultural and other land-based rural businesses; c) sustainable rural tourism and leisure developments which respect the character of the countryside; and d) the retention and development of accessible local services and community facilities, such as local shops, meeting places, sports venues, open space, cultural buildings, public houses and places of worship.

The Stretton Grandison Group NDP addresses these matters through **Policy SG9** Re-Use of Former Agricultural Buildings for Local Economic Development which supports proposals for the small scale and sensitive conversion of redundant former agricultural buildings for suitable business uses such as offices, workshops, cafes, visitor accommodation and live / work units subject to local criteria. **Policy SG10** New Agricultural Buildings and Poly Tunnels guides new agricultural buildings. The NDP area lacks community facilities such as a village hall / parish rooms and does not include a school, pub or any local shops. There are churches at Castle Frome, Canon Frome Court and Stretton Grandison.

Paragraph 91 sets out that planning policies and decisions should aim to achieve healthy, inclusive and safe places which promote social interaction, are safe and accessible and enable and support healthy lifestyles. **Policy SG8** sets out that proposals for new development should aim to promote walking and cycling and public transport by linking to existing routes and facilities where possible. Traffic issues were mentioned throughout the consultations and several NDP Policies promote safe and accessible through traffic calming / road safety measures (such as **Policies SG1, SG8, SG9 and SG10**).

#### 9. Promoting sustainable transport

Paragraph 102 advises that opportunities to promote walking, cycling and public transport use should be identified and pursued. Policy SG8 sets out that proposals for new development should aim to promote walking and cycling and public transport by linking to existing routes and facilities where possible and including suitable storage provision for bicycles.

#### 11. Making effective use of land

Paragraph 118 advises that planning policies should a) encourage multiple benefits from both urban and rural land, including through mixed use schemes and taking opportunities to achieve net environmental gains – such as developments that would enable new habitat creation or improve public access to the countryside; and b) recognise that some undeveloped land can perform many functions, such as for wildlife, recreation, flood risk mitigation, cooling/shading, carbon storage or food production.

The NDP supports landscape and habitat protection and enhancement in **Policy SG5**. This Policy also promotes restoration and enhancement of ditches and watercourses, restoration of wetland habitats and seeks opportunities for further wetland habitat creation. Drainage of waterside meadows for new development will be resisted. **Policy SG1** supports development where provision is made for food growing opportunities such as through community allotments or orchards and gardens.

#### 12. Achieving well-designed places

Paragraph 124 explains that the creation of high quality buildings and places is fundamental to what the planning and development process should achieve. Paragraph 125 goes on to say that design policies should be developed with local communities so they reflect local aspirations, and are grounded in an understanding and evaluation of each area's defining characteristics. Neighbourhood plans can play an important role in identifying the special qualities of each area and explaining how this should be reflected in development.

The Stretton Grandison Group NDP includes several detailed policies (such as Policies **SG6** Design Guidelines for Stretton Grandison Conservation Area, **Policy SG7** Design Principles - Protecting and Enhancing Heritage and Local Character and **Policy SG8** Design Principles - Promoting High Quality and Sustainable Design) which together promote high quality design which responds to existing character and context. All policies have been prepared with the close involvement of the local community.

#### 14. Meeting the challenge of climate change, flooding and coastal change

Paragraph 148 advises that the planning system should support the transition to a low carbon future in a changing climate, taking full account of flood risk and coastal change. Paragraph 151 goes on to set out that to help increase the use and supply of renewable and low carbon energy and heat, plans should c) identify opportunities for development to draw its energy supply from decentralised, renewable or low carbon energy supply

systems and for co-locating potential heat customers and suppliers and in paragraph 152, local planning authorities should support community-led initiatives for renewable and low carbon energy, including developments outside areas identified in local plans or other strategic policies that are being taken forward through neighbourhood planning.

**Policy SG1** supports development where schemes incorporate modern and innovative designs including sustainable design technologies to maximise resource and energy efficiency and designs are sensitive to local context and heritage. **Policy SG8** sets out that contemporary designs and modern architectural approaches, including the use of innovative construction techniques to maximise resource and energy efficiency will be supported where they are of outstanding or innovative design and where they clearly demonstrate that they are appropriate to their context. In addition the Policy notes that small scale domestic renewable energy schemes such as solar panels, solar water heating and ground source heat pumps will be supported provided that schemes are sited and designed to be unobtrusive.

**Policy SG11** Community-Led Renewable Energy Schemes also supports appropriate community led projects which would provide low carbon alternatives.

#### Planning and flood risk

Paragraph 157 sets out that plans should avoid, where possible, flood risk to people and property. They should do this, and manage any residual risk, by various measures including c) using opportunities provided by new development to reduce the causes and impacts of flooding (where appropriate through the use of natural flood management techniques). **Policy SG12** Reducing Flood Risk sets out how in areas where fluvial or surface water flood risk is a known issue, proposals will be resisted unless suitable mitigation can be provided which does not exacerbate run off elsewhere. Wherever possible, development proposals should seek to provide a betterment. Development proposals will be required to provide effective surface water drainage measures to protect existing and future residential areas from flooding.

#### 15. Conserving and enhancing the natural environment

Paragraph 170 advises that planning policies and decisions should contribute to and enhance the natural and local environment by protecting and enhancing valued landscapes and sites of biodiversity and recognising the intrinsic character and beauty of the countryside. NDP **Policy SG5** Protecting Local Landscape Character and Wildlife identifies important local landscape features and views for protection and sets out how landscaping schemes can protect, restore and enhance local landscape character.

#### Ground conditions and pollution

Paragraph 180 sets out that planning policies and decisions should ensure that new development is appropriate for its location taking into account the likely effects (including cumulative effects) of pollution on health, living conditions and the natural environment, as well as the potential

sensitivity of the site or the wider area to impacts that could arise from the development. This includes considering such matters as noise and light pollution. Several NDP Policies include protection of the area's dark skies and **Policy SG9** requires proposals for conversions of agricultural buildings to take suitable measures to protect the amenity of occupiers of nearby residential properties and to minimise or otherwise mitigate disturbance, noise, odours, lighting or other pollution.

#### 16. Conserving and enhancing the historic environment

Paragraph 184 advises that heritage assets are an irreplaceable resource, and should be conserved in a manner appropriate to their significance, so that they can be enjoyed for their contribution to the quality of life of existing and future generations. Paragraph 18 goes on to say that plans should set out a positive strategy for the conservation and enjoyment of the historic environment. **Policy SG6** Design Guidelines for Stretton Grandison Conservation Area requires development to be sensitive to the character and setting of the Stretton Grandison Conservation Area and **Policy SG7** Design Principles - Protecting and Enhancing Heritage and Local Character requires development to conserve and enhance built heritage assets in the Group Parish. One site allocation adjoins the conservation area and one lies within the boundary and criteria are provided in the site allocation policies requiring development to be sensitive to the context and special character.

# 3.2 b. Having Special Regard to the Desirability of Preserving any Listed Building or its Setting or any Features of Special Architectural or Historic Interest

The NDP notes the listed buildings in the Group Parish in an Appendix and, where relevant, criteria for proposed site allocations require development proposals to be sensitive to any listed buildings in the local area.

[Note: this Basic Condition only applies to Neighbourhood Development Orders but has been included for the sake of completeness].

#### 3.3 c. Having Special Regard to the Desirability of Preserving or Enhancing Character or Appearance of any Conservation Area

The Plan area includes a Conservation Area and this is referred to throughout the NDP.

[Note: this Basic Condition only applies to Neighbourhood Development Orders but has been included for the sake of completeness].

#### 3.4 d. Contributes to the Achievement of Sustainable Development

The Submission Neighbourhood Development Plan contributes strongly to the achievement of sustainable development. This is set out in more detail in Table 1 above in relation to the economic, social and environmental objectives of the NPPF.

### 3.5 e. In General Conformity with Strategic Local Planning Policy

The Submission Neighbourhood Plan is in general conformity with strategic Local Plan policies contained in the adopted Herefordshire Local Plan Core Strategy 2011-2031. Table 3 sets out the way that the Neighbourhood Plan conforms to the relevant strategic planning policies in the Local Plan.

NDP Policy	Herefordshire Local Plan Core Strategy 2011 - 2031	General Conformity

NDP Policy	Herefordshire Local Plan Core Strategy 2011 - 2031	General Conformity
	Policies, adopted October 2015	
	ability to bolster existing service provision, improve	
	facilities and infrastructure and meet the needs of the	
	communities concerned.	
	The minimum growth target in each rural Housing	
	Market Area will be used to inform the level of housing	
	development to be delivered in the various settlements	
	set out in Figures 4.14 and 4.15. Neighbourhood	
	Development Plans will allocate land for new housing or	
	otherwise demonstrate delivery to provide levels of	
	housing to meet the various targets, by indicating levels	
	of suitable and available capacity.	
	Housing proposals will be permitted where the	
	following criteria are met:	
	1. Their design and layout should reflect the size, role	
	and function of each settlement and be located within	
	or adjacent to the main built up area. In relation to	
	smaller settlements identified in fig 4.15 proposals will	
	be expected to demonstrate particular attention to the	
	form, layout, character and setting of the site and its	
	location in that settlement and/or they result in	
	development that contributes to or is essential to the	
	social well-being of the settlement concerned;	
	2. Their locations make best and full use of suitable	
	brownfield sites wherever possible;	
	3. They result in the development of high quality,	
	sustainable schemes which are appropriate to their	

NDP Policy	Herefordshire Local Plan Core Strategy 2011 - 2031	General Conformity
	Policies, adopted October 2015	
	context and make a positive contribution to the	
	surrounding environment and its landscape setting; and	
	4. They result in the delivery of schemes that generate	
	the size, type, tenure and range of housing that is	
	required in particular settlements, reflecting local	
	demand.	
	Specific proposals for the delivery of local need housing	
	will be particularly supported where they meet an	
	identified need and their long-term retention as local	
	needs housing is secured as such.	
	Policy LD1 – Landscape and townscape	
	Development proposals should:	
	- demonstrate that character of the landscape and	
	townscape has positively influenced the design, scale,	
	nature and site selection, protection and enhancement	
	of the setting of settlements and designated areas;	
	<ul> <li>conserve and enhance the natural, historic and</li> </ul>	
	scenic beauty of important landscapes and features,	
	including Areas of Outstanding Natural Beauty,	
	nationally and locally designated parks and gardens and	
	conservation areas; through the protection of the area's	
	character and by enabling appropriate uses, design and	
	management;	
	<ul> <li>incorporate new landscape schemes and their</li> </ul>	
	management to ensure development integrates	
	appropriately into its surroundings; and	

NDP Policy	Herefordshire Local Plan Core Strategy 2011 - 2031	General Conformity
	Policies, adopted October 2015	
	- maintain and extend tree cover where important to	
	amenity, through the retention of important trees,	
	appropriate replacement of trees lost through	
	development and new planting to support green	
	infrastructure.	
	Policy SD1 – Sustainable design and energy efficiency	
	Development proposals should create safe, sustainable,	
	well integrated environments for all members of the	
	community. In conjunction with this, all development	
	proposals should incorporate the following	
	requirements:	
	<ul> <li>ensure that proposals make efficient use of land -</li> </ul>	
	taking into account the local context and site	
	characteristics;	
	<ul> <li>new buildings should be designed to maintain local</li> </ul>	
	distinctiveness through incorporating local architectural	
	detailing and materials and respecting scale, height,	
	proportions and massing of surrounding development,	
	while making a positive contribution to the architectural	
	diversity and character of the area including, where	
	appropriate, through innovative design;	
	<ul> <li>safeguard residential amenity for existing and</li> </ul>	
	proposed residents;	
	<ul> <li>ensure new development does not contribute to, or</li> </ul>	
	suffer from, adverse impacts arising from noise, light or	

NDP Policy	Herefordshire Local Plan Core Strategy 2011 - 2031	General Conformity
	Policies, adopted October 2015	
	air contamination, land instability or cause ground	
	water pollution;	
	<ul> <li>where contaminated land is present, undertake</li> </ul>	
	appropriate remediation where it can be demonstrated	
	that this will be effective;	
	<ul> <li>ensure that distinctive features of existing buildings</li> </ul>	
	and their setting are safeguarded and where	
	appropriate, restored;	
	<ul> <li>utilise physical sustainability measures that include, in</li> </ul>	
	particular, orientation of buildings, the provision of	
	water conservation measures, storage for bicycles and	
	waste including provision for recycling, and enabling	
	renewable energy and energy conservation	
	infrastructure;	
	<ul> <li>where possible, on-site renewable energy generation</li> </ul>	
	should also be incorporated; create safe and accessible	
	environments, and that minimise opportunities for	
	crime and anti-social behaviour by incorporating	
	Secured by Design principles, and consider the	
	incorporation of fire safety measures;	
	<ul> <li>ensuring designs can be easily adapted and</li> </ul>	
	accommodate new technologies to meet changing	
	needs throughout the lifetime of the development; and	
	utilise sustainable construction methods which	
	minimise the use of non-renewable resources and	
	maximise the use of recycled and sustainably sourced	
	materials; All planning applications including material	
	changes of use, will be expected to demonstrate how	

NDP Policy	Herefordshire Local Plan Core Strategy 2011 - 2031	General Conformity
	Policies, adopted October 2015	
	the above design and energy efficiency considerations	
	have been factored into the proposal from the outset.	
	Policy SS4 Movement and transportation	
	New developments should be designed and located to minimise the impacts on the transport network; ensuring that journey times and the efficient and safe operation of the network are not detrimentally impacted. Furthermore, where practicable, development proposals should be accessible by and facilitate a genuine choice of modes of travel including walking, cycling and public transport. 	
	Policy MT1 – Traffic management, highway safety and promoting active travel	
	Development proposals should incorporate the following principle requirements covering movement and transportation: 1. demonstrate that the strategic and local highway network can absorb the traffic impacts of the development without adversely affecting the safe and efficient flow of traffic on the network or that traffic impacts can be managed to acceptable levels to reduce and mitigate any adverse impacts from the development;	

NDP Policy	Herefordshire Local Plan Core Strategy 2011 - 2031	General Conformity
	Policies, adopted October 2015	
	2. promote and, where possible, incorporate integrated	
	transport connections and supporting infrastructure	
	(depending on the nature and location of the site),	
	including access to services by means other than private	
	motorised transport;	
	3. encourage active travel behaviour to reduce numbers	
	of short distance car journeys through the use of travel	
	plans and other promotional and awareness raising	
	activities;	
	4. ensure that developments are designed and laid out	
	to achieve safe entrance and exit, have appropriate	
	operational and manoeuvring space, accommodate	
	provision for all modes of transport, the needs of people	
	with disabilities and provide safe access for the	
	emergency services;	
	5. protect existing local and long distance footways,	
	cycleways and bridleways unless an alternative route of	
	at least equal utility value can be used, and facilitate	
	improvements to existing or provide new connections to	
	these routes, especially where such schemes have been	
	identified in the Local Transport Plan and/or	
	Infrastructure Delivery Plan; and	
	6. have regard to with both the council's Highways	
	Development Design Guide and cycle and vehicle	
	parking standards as prescribed in the Local Transport	
	Plan - having regard to the location of the site and need	
	to promote sustainable travel choices.	

NDP Policy	Herefordshire Local Plan Core Strategy 2011 - 2031	General Conformity
	Policies, adopted October 2015	
	Where traffic management measures are introduced	
	they should be designed in a way which respects the	
	character of the surrounding area including its	
	landscape character. Where appropriate, the principle	
	of shared spaces will be encouraged.	
	Policy SS7- Addressing climate change	
	Development proposals will be required to include	
	measures which will mitigate their impact on climate	
	change.	
	At a strategic level, this will include:	
	<ul> <li>focussing development to the most sustainable</li> </ul>	
	locations;	
	<ul> <li>delivering development that seeks to reduce the need</li> </ul>	
	to travel by private car and which encourages	
	sustainable travel options including walking, cycling and	
	public transport;	
	<ul> <li>designing developments to reduce carbon emissions</li> </ul>	
	and use resources more efficiently;	
	<ul> <li>promoting the use of decentralised and renewable or</li> </ul>	
	low carbon energy where appropriate;	
	<ul> <li>supporting affordable, local food production,</li> </ul>	
	processing and farming to reduce the county's	
	contribution to food miles;	
	<ul> <li>protecting the best agricultural land where possible</li> </ul>

	Key considerations in terms of responses to climate	
	change include:	
	<ul> <li>taking into account the known physical and</li> </ul>	
	environmental constraints when identifying locations	
	for development;	
	<ul> <li>ensuring design approaches are resilient to climate</li> </ul>	
	change impacts, including the use of passive solar	
	design for heating and cooling and tree planting for	
	shading;	
	<ul> <li>minimising the risk of flooding and making use of</li> </ul>	
	sustainable drainage methods;	
	<ul> <li>reducing heat island effects (for example through the</li> </ul>	
	provision of open space and water, planting and	
	green roofs);	
	<ul> <li>reduction, re-use and recycling of waste with</li> </ul>	
	particular emphasis on waste minimisation on	
	development sites; and	
	developments must demonstrate water efficiency	
	measures to reduce demand on water resources.	

NDP Policy	Herefordshire Local Plan Core Strategy 2011 - 2031	General Conformity
	Policies, adopted October 2015	
	Adaptation through design approaches will be	
	considered in more locally specific detail in a Design	
	Code Supplementary Planning Document.	
	Policy SD3 – Sustainable water management and water	
	resources	
	Measures for sustainable water management will be	
	required to be an integral element of new development	
	in order to reduce flood risk; to avoid an adverse impact	
	on water quantity; to protect and enhance groundwater	
	resources and to provide opportunities to enhance	
	biodiversity, health and recreation. This will be achieved	
	by ensuring that:	
	1. development proposals are located in	
	accordance with the Sequential Test and Exception	
	Tests (where appropriate) and have regard to the	
	Strategic Flood Risk Assessment (SFRA) 2009 for	
	Herefordshire;	
	2. development is designed to be safe, taking into	
	account the lifetime of the development and the need	
	to adapt to climate change by setting appropriate floor	
	levels, providing safe pedestrian and vehicular access,	
	where appropriate, implementing a flood evacuation	
	management plan and avoiding areas identified as being	
	subject to Rapid Inundation from a breach of a Flood	
	Defence;	

NDP Policy	Herefordshire Local Plan Core Strategy 2011 - 2031	General Conformity
	Policies, adopted October 2015	
	3. where flooding is identified as an issue, new	
	development should reduce flood risk through the	
	inclusion of flood storage compensation measures, or	
	provide similar betterment to enhance the local flood	
	risk regime;	
	4. development will not result in the loss of open	
	watercourse and culverts should be opened up where	
	possible to improve drainage and flood flows. Proposals	
	involving the creation of new culverts (unless essential	
	to the provision of access) will not be permitted;	
	5. development includes appropriate sustainable	
	drainage systems (SuDS) to manage surface water	
	appropriate to the hydrological setting of the site.	
	Development should not result in an increase in runoff	
	and should aim to achieve a reduction in the existing	
	runoff rate and volumes, where possible;	
	6. water conservation and efficiency measures are	
	included in all new developments, specifically:	
	<ul> <li>residential development should achieve Housing -</li> </ul>	
	Optional Technical Standards - Water efficiency	
	standards. At the time of adoption the published water	
	efficiency standards were 110 litres/person/ day; or	
	<ul> <li>non-residential developments in excess of 1,000 m2</li> </ul>	
	gross floorspace to achieve the equivalent of BREEAM 3	
	credits for water consumption as a minimum;	
	7. the separation of foul and surface water on new	
	developments is maximised;	

NDP Policy	Herefordshire Local Plan Core Strategy 2011 - 2031	General Conformity
	Policies, adopted October 2015	
	8. development proposals do not lead to deterioration	
	of EU Water Framework Directive water body status;	
	9. development should not cause an unacceptable risk	
	to the availability or quality of water resources; and	
	10. in particular, proposals do not adversely affect water	
	quality, either directly through unacceptable pollution	
	of surface water or groundwater, or indirectly through	
	overloading of Wastewater Treatment Works.	
	Development area coals should halp to concerve and	
	Development proposals should help to conserve and	
	enhance watercourses and riverside habitats, where	
	necessary through management and mitigation	
	measures for the improvement and/or enhancement of	
	water quality and habitat of the aquatic environment.	
	Proposals which are specifically aimed at the sustainable	
	management of the water environment will in particular	
	be encouraged, including where they are required to	
	support business needs such as for agriculture.	
	Innovative measures such as water harvesting, winter	
	water storage and active land use management will also	
	be supported. In all instances it should be demonstrated	
	that there will be no significant adverse landscape,	
	biodiversity or visual impact.	

# 3.6 f. Be Compatible with EU Obligations

The Submission Neighbourhood Plan is fully compatible with EU Obligations.

The making of the neighbourhood development plan is not likely to have a significant effect on a European site (as defined in the Conservation of Habitats and Species Regulations 2010(2)) or a European offshore marine site (as defined in the Offshore Marine Conservation (Natural Habitats, &c.) Regulations 2007(3)) (either alone or in combination with other plans or projects).

# Strategic Environmental Assessment (SEA)

To meet the 'basic conditions' which are specified by law a Neighbourhood Development Plan must be compatible with EU obligations. Furthermore, as at 9th February 2015 Regulation 15 of the 2012 Neighbourhood Planning Regulations was amended to require that when a plan is submitted to the Local Planning Authority it should include either an environmental report prepared in accordance with the applicable regulations or where it has been determined as unlikely to have significant environmental effects, a statement of reasons for the determination.

A Draft Environmental Report for Stretton Grandison Neighbourhood Area was prepared by Herefordshire Council in October 2019 (see <a href="https://www.herefordshire.gov.uk/directory\_record/3105/stretton\_grandison\_group\_neighbourhood\_development\_plan">https://www.herefordshire.gov.uk/directory\_record/3105/stretton\_grandison\_group\_neighbourhood\_development\_plan</a>).

The Non Technical Summary sets out that:

"Strategic Environmental Assessment (SEA) is an important part of the evidence base which underpins Neighbourhood Development Plans (NDP), as it is a systematic decision support process, aiming to ensure that environmental assets, including those whose importance transcends local, regional and national interests, are considered effectively in plan making.

The Stretton Grandison Group Parish have undertaken to prepare an NDP and this process has been subject to environmental appraisal pursuant to the SEA Directive. The Parish comprises the parishes of Stretton Grandison, the parish lies 8 miles north west pf Ledbury and 10 miles north east to the city pf Hereford. The Draft Stretton Grandison NDP includes 6 objectives and it is intended that these objectives will be delivered by 12 mostly criteria based planning policies and 5 site allocations, to accommodate up to 23 dwellings. A settlement boundary is proposed for Stretton Grandison, Lower Eggleton, Fromes Hill, Canon Frome and Eggleton. The environmental appraisal of the Stretton Grandison NDP has been undertaken in line with the Environmental Assessment of Plan and Programmes Regulations 2004. Stage A of the SEA process involved Scoping and Stage B provided a review and analysis of the NDP. Stage C involved preparing an Environmental Report and Stage D comprises a formal consultation on both this and the Draft Plan itself.

Habitat Regulations Assessment (HRA) screening has been carried out as the Group Parish falls within the catchment for the River Wye (including the Lugg) SAC, Wye Valley and Forest pf Dean Bat Sites and Wye Valley Woodlands SAC. The HRA assesses the potential effects of the NDP on the River Wye (including the Lugg) SAC, Wye Valley and Forest pf Dean Bat Sites and Wye Valley Woodlands SAC.

On the whole, it is considered that the Stretton Grandison Group NDP is in general conformity with both national planning policy contained in the National Planning Policy Framework and strategic policies set within the Herefordshire Local Plan (Core Strategy).

Once made (adopted) by Herefordshire Council, the effects of the policies within the Stretton Grandison NDP will be monitored annually via the Council's Annual Monitoring Report (AMR)."

# **Requirement for Habitats Regulations Assessment (HRA)**

Article 6 (3) of the EU Habitats Directive (Council Directive 92/43/EEC) and Regulation 61 of the Conservation of Habitats and Species Regulations 2010 (as amended) requires that an appropriate assessment of plans and programmes is carried out with regard to the conservation objectives of European Sites (Natura 2000 sites) and that other plans and projects identify any significant effect that is likely for any European Site. In the context of neighbourhood planning, a Habitats Regulation Assessment (HRA) is required where a Neighbourhood Plan is deemed likely to result in significant negative effects occurring on protected European Sites (Natura 2000 sites) as a result of the plan's implementation.

The Habitats Regulations Assessment Addendum Report for Stretton Grandison Group Neighbourhood Area was prepared by Herefordshire Council in November 2017 - see

https://www.herefordshire.gov.uk/download/downloads/id/19021/draft\_habitats\_regulations\_assessment\_october\_2019.pdf

The Conclusion sets out that

"10.1 With reference to sections 6 to 9 above, the modifications to the NDP are not considered to affect the findings of this HRA report.

10.2 Therefore the earlier conclusions that the Stretton Grandison Group NDP will not have a likely significant effect on the River Wye SAC."

#### Additional Basic Conditions (December 2018)

(see National Planning Practice Guidance (para Paragraph: 079 Reference ID: 41-079-20140306)

<u>Regulations 32 and 33 of the Neighbourhood Planning (General) Regulations 2012</u> (as amended) set out 2 basic conditions in addition to those set out in the primary legislation. Only one is relevant to the NDP. This is:

The making of the neighbourhood plan is not likely to have a significant effect on a European site (as defined in the Conservation of Habitats and Species Regulations 2012) or a European offshore marine site (as defined in the Offshore Marine Conservation (Natural Habitats, &c.) Regulations 2007) (either alone or in combination with other plans or projects). (See <u>Schedule 2 to the Neighbourhood Planning (General) Regulations 2012(as amended</u>) in relation to the examination of neighbourhood development plans.)

Please see the updated SEA and HRA for further information about this has been taken into account in relation to the Stretton Grandison Group NDP.

# **European Convention on Human Rights**

The Submission Neighbourhood Plan is fully compatible with the European Convention on Human Rights. It has been prepared with full regard to national statutory regulation and policy guidance, which are both compatible with the Convention. The Plan has been produced in full consultation with the local community. The Plan does not contain policies or proposals that would infringe the human rights of residents or other stakeholders over and above the existing strategic policies at national and district-levels, as demonstrated below.

The Human Rights Act 1998 incorporated into UK law the European Convention on Human Rights ('The Convention'). The Convention includes provision in the form of Articles, the aim of which is to protect the rights of the individual.

Section 6 of the Act prohibits public bodies from acting in a manner, which is incompatible with the Convention. Various rights outlined in the Convention and its First Protocol are to be considered in the process of making and considering planning decisions, namely:

Article 1 of the First Protocol protects the right of everyone to the peaceful enjoyment of possessions. No one can be deprived of possessions except in the public interest and subject to the conditions provided by law and by the general principles of international law. The Submission Neighbourhood Plan is fully compatible with the rights outlined in this Article. Although the Submission Plan includes policies that would restrict development rights to some extent, this does not have a greater impact than the general restrictions on development rights provided for in national law, namely the Planning and Compulsory Purchase Act 2004 and the Localism Act 2011. The restriction of development rights inherent in the UK's statutory planning system is demonstrably in the public interest by ensuring that land is used in the most sustainable way, avoiding or mitigating adverse impacts on the environment, community and economy.

Article 6 protects the right to a fair and public hearing before an independent tribunal in determination of an individual's rights and obligations. The process for Neighbourhood Plan production is fully compatible with this Article, allowing for extensive consultation on its proposals at various stages, and an independent examination process to consider representations received.

Article 14 provides that 'The enjoyment of the rights and freedoms set forth in ... [the] ... European Convention on Human Rights shall be secured without discrimination on any ground such as sex, race, colour, language, religion, political or other opinion, national or social origin, association with a national minority, property, birth or other status.' The Parish Council has developed the policies and proposals within the Plan in full consultation with the community and wider stakeholders to produce as inclusive a document as possible. In general, the policies and proposals will not have a discriminatory impact on any particular group of individuals.

# 3.7 g. Prescribed conditions are met in relation to the Order (or plan) and prescribed matters have been complied with in connection with the proposal for the order (or neighbourhood plan).

The prescribed conditions have therefore been met in relation to the Neighbourhood Development Plan (NDP) and prescribed matters have been complied with in connection with the proposal for the Plan.
