

Local Transport Plan objective

**Welcome to the Local Transport Plan 4 consultation survey. We've identified these objectives and we'd like your views on their priority.**

1. Enable economic growth - by building new roads linking new developments to the transport network and by reducing short distance car journeys. Please rate priority from 1-5 (1 being most important)

5

2. Provide a good quality transport network for all users – by being proactive in our asset management and by working closely with the public, Highways England and rail and bus companies.

4

3. Promote healthy lifestyles – by making sure new developments maximise walking, cycling and bus use, by delivering and promoting active travel schemes and by reducing short distance single occupant car journeys on our roads.

1

4. Make journeys easier and safer – by making bus and rail tickets compatible and easier to buy and use, by providing 'real time' information at well-equipped transport hubs, by improving signage to walking and cycling routes and by helping people feel safe during their journeys.

2

5. Ensure access to services for those living in rural areas – by improving the resilience of our road network and by working closely with all transport operators to deliver a range of transport options particularly for those without a car.
