# Strategic Environmental Assessment

## Woolhope Neighbourhood Area

### **Scoping Report**

April 2016

#### **Consultation on the Scoping Report**

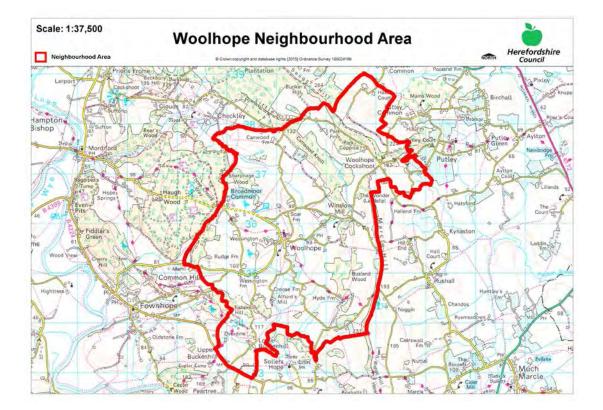

The aim of the consultation process is to involve and engage with statutory consultees and other relevant bodies on the scope of the appraisal. In particular, it seeks to:

- Ensure the SEA is both comprehensive and sufficiently robust to support the Neighbourhood Development Plan during the later stages of full public consultation;
- Seek advice on the completeness of the plan review and baseline data and gain further information where appropriate;
- Seek advice on the suitability of key sustainability issues;
- Seek advice on the suitability of the sustainability objectives.

Comments on this Scoping Report have been invited from the three consultation bodies as required by the SEA regulations, together with Natural Resources Wales.

The three consultation bodies are as follows:

- 1. Natural England;
- 2. Historic England;
- 3. Environment Agency.

#### Template A1: Identification and review of local Neighbourhood Area relevant plans, policies and programmes

Parish Council Name: Woolhope.

Neighbourhood Development Plan Name: Woolhope Neighbourhood Development Plan

#### Date completed: April 2016

| Plans and<br>Programmes   | Type of document                 | Date | Overview   | Key message,<br>target/objective/indicator   | SEA topic(s) <sup>1</sup>   | Implications for the NDP and SEA  |
|---|----------------------------------|------|--|--|---|---|
| The EC<br>Conservation<br>of Habitats<br>and Species<br>Regulations | European<br>Union<br>Legislation | 2010 | These regulations<br>transpose the<br>Habitats Directive<br>in England, Wales<br>and to a limited<br>extent Scotland by<br>ensuring that<br>activities are<br>carried out in<br>accordance with<br>the Habitats<br>Directive, which is<br>to protect<br>biodiversity through<br>the conservation of<br>natural habitats and<br>species of wild flora<br>and fauna. | The Regulations make it an<br>offence (subject to<br>exceptions) to deliberately<br>capture, kill, disturb, or trade<br>in the animals listed in<br>Schedule 2, or pick, collect,<br>cut, uproot, destroy, or trade<br>in the plants listed in<br>Schedule 4. However, these<br>actions can be made lawful<br>through the granting of<br>licenses by the appropriate<br>authorities. | <ul> <li>Biodiversity</li> <li>Cultural<br/>heritage and<br/>the landscape</li> </ul> | The Neighbourhood<br>Plan should be<br>compliant with all the<br>relevant legislation and<br>regulations. |
| The EC Water<br>Framework<br>Directive                              | European<br>Union                | 2000 | Commits all EU<br>member states to<br>achieve good<br>qualitative and<br>quantitative status<br>of all water courses<br>by 2015  | Aims for 'good status' for all<br>ground and surface waters<br>(rivers, lakes, transitional<br>waters, and coastal waters)<br>in the EU  | • Water   | The Neighbourhood<br>Plan should be<br>compliant with all the<br>relevant legislation and<br>regulations. |

<sup>&</sup>lt;sup>1</sup> Derived from the LDF General Scoping Report (June 2007)

Identification and review of relevant plans, policies and programmes (April 2016)

| Plans and<br>Programmes                          | Type of<br>document     | Date | Overview  | Key message,<br>target/objective/indicator   | SEA topic(s) <sup>1</sup>   | Implications for the NDP and SEA  |
|--|-------------------------|------|---|--|---|---|
| The Wildlife<br>and<br>Countryside<br>Act (1981) | Domestic<br>Legislation | 1981 | The major legal<br>instrument for<br>wildlife protection in<br>Britain, although<br>other significant<br>acts have been<br>passed since. It has<br>numerous parts<br>and supplementary<br>lists and schedules<br>many of which have<br>been amended<br>since publication. | The principle mechanism for<br>the legislative protection of<br>wildlife in Great Britain. | <ul> <li>Biodiversity</li> <li>Cultural<br/>heritage and<br/>the landscape</li> <li>Flora and fauna</li> <li>Material assets</li> <li>Soil</li> </ul> | The Neighbourhood<br>Plan should be<br>compliant with all the<br>relevant legislation and<br>regulations. |

| Plans and<br>Programmes  | Type of<br>document     | Date | Overview  | Key message,<br>target/objective/indicator  | SEA topic(s) <sup>1</sup>   | Implications for the NDP and SEA  |
|--|-------------------------|------|---|---|---|---|
| The<br>Countryside<br>and Right of<br>Way Act<br>(2000)              | Domestic<br>Legislation | 2000 | Creates a statutory<br>right of access on<br>foot to certain types<br>of open land, to<br>modernise the<br>public rights of way<br>system, to<br>strengthen nature<br>conservation<br>legislation, and to<br>facilitate better<br>management of<br>AONBs. | The Act provides for a new<br>right of access on foot to<br>areas of open land<br>comprising: Mountain (land<br>over 600 metres); Moorland;<br>Heath; Downland;<br>Registered common land.<br>There are provisions to<br>consider extending the right<br>in the future to coastal land,<br>but not woodland despite<br>some early publicity<br>suggesting this. | <ul> <li>Biodiversity</li> <li>Cultural<br/>heritage and<br/>the landscape</li> <li>Flora and fauna</li> <li>Material assets</li> <li>Soil</li> </ul> | The Neighbourhood<br>Plan should be<br>compliant with all the<br>relevant legislation and<br>regulations. |
| The Natural<br>Environment<br>and Rural<br>Communities<br>Act (2006) | Domestic<br>Legislation | 2006 | Designed to help<br>achieve a rich and<br>diverse natural<br>environment and<br>thriving rural<br>communities<br>through<br>modernised and<br>simplified<br>arrangements for<br>delivering  | Provides that any public<br>body or statutory undertaker<br>in England and Wales must<br>have regard to the purpose<br>of conservation of biological<br>diversity in the exercise of<br>their functions.  | <ul> <li>Biodiversity</li> <li>Cultural<br/>heritage and<br/>the landscape</li> <li>Flora and fauna</li> <li>Material assets</li> <li>Soil</li> </ul> | The Neighbourhood<br>Plan should be<br>compliant with all the<br>relevant legislation and<br>regulations. |

#### Appendix A3 – Environmental issues identified from the Woolhope baseline

These environmental issues are the same as most of those identified for the Herefordshire Core Strategy<sup>1</sup>

| SE | А Торіс           | Environmental issue   | SA objectives      |
|----|-------------------|---|--------------------|
| 1  | Air               | High reliance upon the private car causing high levels of air pollution and in Hereford in particular   | Objective 16       |
| I  |                   | Need to reduce carbon emissions by encouraging alternative modes of travel.   | Objective 16       |
|    |                   | Habitats and species of national, regional and local importance are under pressure from the adaptation and diversification of farming and forestry employment.  |                    |
| 2  | Biodiversity      | Habitats and species of national, regional and local importance are under pressure from development   | Objectives 13 &15  |
|    |                   | Minimise loss of biodiversity and expand opportunities for wildlife everywhere.   |                    |
| 3  | Climatic factors  | Reduce greenhouse gas emissions through planning, design and build.   | Objective 16       |
| 4  | Cultural heritage | Woolhope has numerous listed buildings and 1 Scheduled Ancient Monument Churchyard Cross at ST Georges Churchyard, all of which require ongoing protection and many in need of high levels of maintenance. Woolhope has got 1 conservation area.  | Objective 20       |
| 5  | Flora and fauna   | Conserve and enhance the character and quality of historic landscapes, including all types of natural flora and fauna.  | Objective 15       |
| 6  | Material assets   | How the countryside can continue to be managed in an economically, socially and environmentally beneficial way in the face of continuing pressures on traditional farming.  | Objectives 14 & 18 |
| 7  | Population        | Minimise energy waste through good designs, which help to reduce energy consumption and maximise efficiency.  | Objective 15       |
| ,  |                   | Need to avoid enforcement investigations/action concerning locally important buildings and those within conservation areas in particular.   |                    |
| 8  | Soil              | Promoting development of previously developed land and buildings as opposed to greenfield sites or agricultural land of the highest quality.  | Objectives 18 & 19 |
| 9  | Water             | Issues relating to availability of resources, foul drainage, pollution, and abstraction in a county which supports water dependent biodiversity of international and national importance, given the predicted climate change consequences for water availability and demanding projections for new housing. | Objectives 17 & 18 |
|    |                   | Steady decline in the chemical quality of rivers over the last 10 years.  |                    |

| Neighbourhood Area Designation Date: | 28/08/2015                  |  |  |

# Introduction

This Initial Habitat Regulations Assessment (HRA) and Strategic Environmental Assessment (SEA) Screening has been undertaken to assess whether any European sites exist within or in proximity to the Neighbourhood Area which could be affected by any future proposals or policies.

Through continual engagement the outcomes of any required assessments will help to ensure that proposed developments will not lead to Likely Significant Effects upon a European site or cause adverse impacts upon other environmental assets, such as the built historic or local natural environment.

HRA Initial Screening

Map showing relationship of Neighbourhood Area with European Sites (not to scale)

# River Wye (including the River Lugg) Special Area of Conservation (SAC):

| Does the Neighbourhood Area have the River<br>Wye (including the River Lugg) in or next to its<br>boundary? | N | The River Wye/Lugg is 1.25km away from the Parish                 |
|---|---|---|
| Is the Neighbourhood Area in the hydrological catchment of the River Wye (including the River Lugg) SAC?    | Y | The Parish is within the hydrological catchment of the River Wye. |
| If yes above, does the Neighbourhood Area have mains drainage to deal with foul sewage?                     | Y | There is mains drainage at Woolhope.                              |

# Downton Gorge SAC:

| Is the Neighbourhood Area within 10km of | Ν | Downton Gorge is 39.6km away from the |  |  |  |
|--|---|---------------------------------------|--|--|--|
| Downton Gorge SAC?                       |   | Parish.                               |  |  |  |
|  |   |                                       |  |  |  |

## **River Clun SAC:**

| Does the River Clun border the Neighbourhood | Ν | River Clun does not border the parish. |
|--|---|--|
| Area   |   |  |

## Wye Valley & Forest of Dean Bat Sites SAC:

| th | the Neighbourhood Area within 10km of any of<br>e individual sites that make up the Wye Valley & | Wye Valley and Forest of Dean Bat Sites are 13.8km away from the Parish. |
|----|--|--|
| Fo | prest of Dean Bat Sites?   |  |

#### Wye Valley Woodlands SAC:

| Is the Neighbourhood Area within 10km of any of<br>the individual sites that make up the Wye Valley<br>Woodlands Site? |  | Wye Valley Woodlands are 18.1km away from the Parish. |
|--|--|---|
|--|--|---|

#### **HRA Conclusion:**

The assessment above highlights that European Sites will need to be taken into account in the future Neighbourhood Development Plan for the Woolhope Neighbourhood Area and a Full HRA Screening will be required.

#### **European Site**

(List only those which are relevant from above)

River Wye (including the River Lugg) SAC

## Strategic Environmental Assessment Initial Screening for nature conservation landscape and heritage features

The following environmental features are within or in general proximity to the Woolhope Neighbourhood Area and would need to be taken into account within a Strategic Environmental Assessment. In addition, the NDP will also need to consider the other SEA topics set out in Guidance Note 9a to ensure that the plan does not cause adverse impacts.

|  |                 | Within Neighbourhood Area  | Bordering Neighbourhood Area |   |  |

#### **Decision Notification:**

The initial screening highlights that the Neighbourhood Development Plan for the Woolhope Neighbourhood Area:

a) Will require further environmental assessment for Habitat Regulations Assessment and Strategic Environmental Assessment.

Assessment date: 07/08/2015

Assessed by: James Latham

#### **Appendix 1: European Sites**

The table below provides the name of each European Site, which has been screened in for the purposes of neighbourhood planning in Herefordshire; includes their site features of integrity; and vulnerability data. This is based on the sites individual features of integrity and their vulnerabilities, which could include distance criteria. This has been used in identifying which parishes are likely to require a full HRA Screening of their future Neighbourhood Development Plan, to establish if their plan might have Likely Significant Effects on a European Site.

#### **Downton Gorge**

Site Features: *Tilio-Acerion* forests of slopes, screes and ravines

Vulnerability data: 10km for air quality associated with poultry units or other intensive agricultural practices.

#### **River Clun**

Site Features: Freshwater pearl mussel Margaritifera margaritifera

Vulnerability data: Water quality is important to maintain the site feature. Parishes either side of the River Clun will be affected.

#### **River Wye**

**Site Features:** Water courses of plain to montane levels with the *Ranunculion fluitantis* and *Callitricho-Batrachion* vegetation. Transition mires and quaking bogs. White-clawed (or Atlantic Stream) crayfish *Austropotamobius pallipes*. Sea lamprey *Petromyzon marinus*. Brook lamprey *Lampetra planeri*. River lamprey *Lampetra fluviatilis*. Twaite shad *Alosa fallax*. Atlantic salmon *Salmo salar*. Bullhead *Cottus gobio*. Otter *Lutra lutra*. Allis shad *Alosa alosa* 

Vulnerability data: Proximity: Developments should not be within 100m of the designated bank. Some developments beyond 100m may also have impacts based on proximity and these issues should be addressed where possible when developing NDP policy and choosing site allocations.

Water Quality: Within the whole catchment of the River Wye, which includes the River Lugg, mains drainage issues with regards to water quality are being resolved through the Core Strategy / Local Plan and development of a Nutrient Management Plan. Welsh Water should be consulted to ensure that the proposed growth will be within the limit of their consents.

Otters: "An otter will occupy a 'home range', which on fresh waters usually includes a stretch of river as well as associated tributary streams, ditches, ponds, lakes and woodland. The size of a home range depends largely on the availability of food and shelter, and the presence of neighbouring otters. On rivers, a male's home range may be up to 40km or more of watercourse and associated areas; females have smaller ranges (roughly half the size) and favour quieter locations for breeding, such as tributary streams.

Otters without an established home range are known as 'transients'. They are mostly juveniles looking for a territory of their own, or adults that have been pushed out of their territories. Transient otters may use an area for a short while, but they will move on if conditions are not suitable or if they are driven away by resident otters. Transients will have been important in extending the range of otters, but they are very difficult to identify from field signs.

Within a home range an otter may use many resting sites. These include above-ground shelters, such as stands of scrub or areas of rank grass, and underground 'holts' – for example, cavities under tree roots and dry drainage pipes."

Wye Valley and Forest of Dean Bat Sites

**Site Features:** Annex II species that are a primary reason for site selection: Lesser horseshoe bat *Rhinolophus hipposideros*. Greater horseshoe bat *Rhinolophus ferrumequinum* 

**Vulnerability data:** Lesser Horseshoe bats are known to migrate between 5km and 10km between their summer and winter roosts. The Lesser Horseshoe Bat is vulnerable to disturbance; light pollution; and habitat loss. Check with the planning ecologist for other issues.

Greater Horseshoe bats are known to migrate between 20-30km between their summer and winter roosts.

NDPs closest to the European Site will need to consider:

Woodland habitat buffer.

Lesser Horseshoe Bat: Old buildings; woodland locations; sheltered valleys, extensive deciduous woods or dense scrub, close to roost sites. In areas of fragmented habitats, linear habitats such as hedgerows are important corridors. Vulnerable to loss or disturbance of both summer and winter roosts and removal of linear habitat.

Greater Horseshoe Bat: Large buildings, pasture, edge of mixed deciduous woodland and hedgerows. Mixed land-use especially south-facing slopes, favours beetles, moths and insects they feed on. During the winter they depend on caves, abandoned mines and other underground sites for undisturbed hibernation. A system/series of sites required. Vulnerable to loss of insect food supply, due to insecticide use, changing farming practices and loss of broad-leaved tree-cover and loss / disturbance of underground roosts sites.

#### Wye Valley Woodlands

**Site Features:** Annex I habitats that are a primary reason for site selection: Beech forests *Asperulo-Fagetum, Tilio-Acerion* forests of slopes, screes and ravines, *Taxus baccata* woods of the British Isles. Annex II species present as a qualifying feature, but not a primary reason for site selection: Lesser horseshoe bat *Rhinolophus hipposideros*, 51-100 residents

Vulnerability data: Lesser Horseshoe bats are known to migrate between 5km and 10km between their summer and winter roosts. The Lesser Horseshoe Bat is vulnerable to disturbance; light pollution; and habitat loss. Check with the planning ecologist for other issues. NDPs closest to the European Site will need to consider: Woodland habitat buffer. Lesser Horseshoe Bat: Old buildings; woodland locations; sheltered valleys, extensive deciduous woods or dense scrub, close to roost sites. In areas of fragmented habitats, linear habitats such as hedgerows are important corridors. Vulnerable to loss or disturbance of both summer and winter roosts and removal of linear habitat.
