

				<p>addendum report reveals that none of the changes proposed to the policies through the Main Modifications would affect the conclusions set out in the September 2014 HRA Report. It also makes clear that the roll out of the Nutrient Management Plan (NMP) should avoid adverse effects.</p> <p>Improved water efficiency measures, metering and addressing leakages in the supply may help to mitigate any additional pressures on the water supply as a result of new development.</p>
