

Letter to Samantha Banks  
Herefordshire Council

4 January 2019

Dear Sam,

**Examination of the Hampton Bishop Neighbourhood Plan  
Amendment to the Basic Conditions**

I am writing to draw your attention to the Conservation of Habitats and Species and Planning (Various Amendments) (England and Wales) Regulations 2018 which came into force on 28 December 2018.

Amongst other things, these Regulations amend the basic condition prescribed in Regulation 32 and Schedule 2 (Habitats) of the Neighbourhood Planning (General) Regulations 2012 (as amended) which stated:

- The making of the neighbourhood plan is not likely to have a significant effect on a European site or a European offshore marine site either alone or in combination with other plans or projects.

**The Regulations substitute a new basic condition which states:**

- **The making of the neighbourhood development plan does not breach the requirements of Chapter 8 of Part 6 of the Conservation of Habitats and Species Regulations 2017.**

The Conservation of Habitats and Species Regulations 2017 include regulations on the assessment of plans (including neighbourhood plans) and projects on European sites or European offshore marine sites. The first stage is to screen the plan to see whether it is likely to have a significant effect on any European site. If the plan is 'screened in' because significant effects cannot be ruled out, the next stage is for an appropriate assessment to be carried out considering the impact on the European site's conservation objectives. Consent for the plan can only be given if it is 'screened out' at the first stage or the appropriate assessment concludes the integrity of the European site will not be adversely affected.

Case law (*People Over Wind, Peter Sweetman v Coillte Teoranta*) ruled that it is not permissible to take account of measures intended to reduce or avoid any harmful effects of a plan or project on a European site at the screening stage. This represented a move away from what was common practice. Any 'mitigation' measures can now only be considered at the appropriate assessment stage.

This resulted in some confusion as to whether neighbourhood plans 'screened in' could progress because of the wording of the basic condition.

The substituted basic condition removes this confusion; it gives certainty that those neighbourhood plans which have been 'screened in' and therefore require appropriate assessment can continue to progress (provided that the requirements of Chapter 8 of Part 6 of the Conservation of Habitats and Species Regulations 2017 are met).

The process for appropriate assessment of neighbourhood plans is the same as assessments for Local Plans.

There are no transitional arrangements and so the substituted basic condition applies from 28 December 2018. It will therefore apply to any neighbourhood plans currently at examination or those submitted for examination on or after 28 December 2018.

As all basic conditions must be met by a neighbourhood plan before it can proceed, I would be grateful if you would consider this change to the basic conditions and let me know of any implications arising from it for the examination of this neighbourhood plan. I will reach my own view on this matter as well.

Once you have had an opportunity to consider what, if any, further work needs to be undertaken, I suggest that we agree a way forward for the examination of the Neighbourhood Plan, including any new timescales should further work be required.

This letter should be placed on the relevant Council websites.

With many thanks,

Ann Skippers MRTPI
