Neighbourhood Planning (1.0)	All			Comment	<u>General comments</u> Overall the plan is a well written and well researched plan. It is clear to see that the policies have taken into account the views of the local community and have carried out various consultations. It is clear that the plan takes a positive approach towards identifying settlement boundaries and allocation of housing in line with the Core Strategy.	Noted.	No change.
Development Management (2.0)				N/A	No comments received	Noted.	No change.

National Grid Statutory Consultee (1.0)	All			Comment.	<p>Lyonshall Neighbourhood Plan Consultation SUBMISSION ON BEHALF OF NATIONAL GRID National Grid has appointed Wood to review and respond to development plan consultations on its behalf. We are instructed by our client to submit the following representation with regards to the above Neighbourhood Plan consultation.</p> <p>About National Grid National Grid owns and operates the high voltage electricity transmission system in England and Wales and operate the Scottish high voltage transmission system. National Grid also owns and operates the gas transmission system. In the UK, gas leaves the transmission system and enters the distribution networks at high pressure. It is then transported</p>	Noted.	No change.

National Grid own four of the UK's gas distribution networks and transport gas to 11 million homes, schools and businesses through 81,000 miles of gas pipelines within North West, East of England, West Midlands and North London. To help ensure the continued safe operation of existing sites and equipment and to facilitate future infrastructure investment, National Grid wishes to be involved in the preparation, alteration and review of plans and strategies which may affect our assets.</p> <p>Specific Comments An assessment has been carried out with respect to National Grid's electricity and gas transmission apparatus which includes high voltage electricity assets and high-pressure gas pipelines, and also National Grid Gas Distribution's Intermediate and High-Pressure apparatus.</p> <p>National Grid has identified that it has no record of such apparatus within the Neighbourhood Plan area.</p> <p>Key resources / contacts National Grid has provided information in relation to electricity</p>

Environment Agency (5.1)	All			Comment.	<p>LYONSHALL REGULATION 14 DRAFT NEIGHBOURHOOD PLAN</p> <p>I refer to your email of the 24 October 2018 in relation to the above Neighbourhood Plan (NP) consultation. We have reviewed the submitted document and would offer the following comments at this time.</p> <p>As part of the adopted Herefordshire Council Core Strategy updates were made to both the Strategic Flood Risk Assessment (SFRA) and Water Cycle Strategy (WCS). This evidence base ensured that the proposed development in Hereford City, and other strategic sites (Market Towns), was viable and achievable.</p> <p>The updated evidence base did not extend to Rural Parishes at the NP level so it is important that these subsequent plans offer robust confirmation that</p>	Noted. 					development is not impacted by flooding and that there is sufficient waste water infrastructure in place to accommodate growth for the duration of the plan period.		
(5.2)			LH1	Comment.	<p>Development and Flood Risk: We would raise concern, at this time, at the lack of information within the NP relating to the water environment, notably flood risk.</p> <p>Whilst the Adopted Core Strategy has a robust Flood Risk Policy (Policy SD3) the associated evidence base, as stated above, did not include a detailed assessment of the impacts of flooding in rural parishes.</p>	<p>Accepted.</p> <p>The supporting text for Policy LH1 should refer to areas of known flood risk within the village.</p> <p>Map 7 shows flood zones but Environment Agency Flood Maps for Planning could be referenced in the text as the online resource provides the most up to date information at any one time.</p> <p>Delete Map 3 as it is repetitious - the sites are in the policies map and figures in the table.</p>	<p>Amend NDP.</p> <p>Insert additional text after para 3.1.14 and renumber other paragraphs:</p> <p><i>"At the Regulation 14 consultation stage representations were submitted by the Environment Agency expressing concern at the lack of information within the NDP relating to the water environment, notably flood risk. The area to the south and east of the village includes an area of known fluvial flood risk as shown on Map 3 below (as provided by the Environment Agency). The settlement boundary and proposed site allocation B has been amended to exclude this area and Policy LH1 has been amended to include additional text to guide development away from areas of known flood risk. (5.3)			LH1	Comment / Objection.	<p>This raises concern as one of the proposed housing sites (Site B) is located partially within Flood Zones 2, the medium risk zone. I have attached a copy of the Indicative Flood Map for your information.</p> <p>In order to demonstrate that the site is appropriate, and developable, we would expect an assessment of flood risk (evidence) prior to final submission.</p> <p>We would expect a sequential justification of why this site has been allocated over sites within areas of lower flood risk, as referred to in bullet point one of the Core Strategy Policy SD3.</p>	<p>Accepted.</p> <p>See 5.2 above. The boundaries of the settlement boundary and proposed site allocation Site B have been amended to exclude the area at known risk of flooding.</p>	No further change.

					An assessment of flood risk should be undertaken to ascertain the precise level of risk and whether the site can be developed safely without increasing flooding to third parties. It may be viable to accommodate the required housing numbers (18 dwellings) on the site but evidence/confirmation will need to be submitted to demonstrate that the allocation is viable.		
(5.4)		3.1.1 4		Comment.	As stated in the associated Scoping Report (March 2015) reference should be made to Herefordshire Council's Strategic Flood Risk Assessment (SFRA) 2009. 					Neighbourhood Planning team to discuss this further.		<i>expected to take account of the new SFRA following its publication."</i>
(5.5)			LH1	Comment.	<p>In reference to the above, page 22 (SEA Scoping Task A1) confirms that 'up-to-date flood risk information should be gathered from the Environment Agency, in order to ensure that flood risks are considered when preparing the Lyonshall NDP'. Similarly page 8 (SEA Scoping Task A4) picks up water matters and the need to avoid, manage and reduce flood risk and 'prevent inappropriate development of the floodplain'.</p> <p>The Flood Map at this location has not been produced from a detailed hydraulic model but by using a national, generalised mapping technique. Whilst this is the best data available at the current time, this is for indicative purposes only and may not be an accurate representation of the floodplain in this location as this type of mapping does not include the presence of structures such as bridges and culverts on flooding.</p>	<p>Noted.</p> <p>Herefordshire Council did not include comments about flood risk at Reg 14 (see Table 1).</p> <p>However the Parish Council is committed to continuing to work closely with Herefordshire Council on the NDP and has referred the proposed amended revised settlement boundary and site allocation boundary to the land drainage team for any further comments. The NDP Team has confirmed by email (dated 20 December 2018) that they support this approach.</p>	No further change at this stage.

Consultee and Ref. No.	Page No.	Para. No.	Vision/ Objective / Policy No.	Support / Object / Comment	Comments received	Parish Council's Consideration	Amendments to Lyonshall NDP
					<p>It should be noted that the river network that impacts Lyonshall, the Curl Brook in this instance, is classified as 'ordinary watercourse' and falls under the jurisdiction of Herefordshire Council and the Lead Local Flood Authority.</p> <p>We would therefore recommend discussions with the Land Drainage team at Herefordshire Council with regard to the suitability of the proposed development throughout the village.</p>

(5.7)			LH1	Comment.	<p>In consideration of the above we would therefore expect greater consideration of flood risk within the next iteration of the NP. In conformity with both the National Planning Policy Guidance (NPPG) and Herefordshire Councils Adopted Core Strategy (Policy SD3) we would expect adherence to a Sequential approach to flood risk with all built development being located within Flood Zone 1, the low risk Zone, in the first instance.</p> <p>Whilst conformity with the Core Strategy is vital with regards to development and flood risk there may be scope to add a locally specific flood risk policy point to address any flood risk issues the Parish has. Discussions with Herefordshire Council and their land drainage team may identify such flood</p>	<p>Accepted.</p> <p>See (5.2) above.</p>	No further change.

(5.8)	All			Comment.	<p>Water Quality/Foul Water Drainage: With regards to foul drainage all new development throughout the Plan area should be assessed against the capacity of local infrastructure. In this instance we would expect consultation with Welsh Water to ensure that the scale of development can be accommodated.</p> <p>As you are aware, as part of the WSC update/addendum, an assessment of Sewage Treatment Works within the County was undertaken with data collated by both Welsh Water and ourselves.</p> <p>The Plan should make reference to this information to provide re-assurance that there is</p>	Noted. Woodland Trust (7.1)	All			Comment.	<p>Thank you very much for consulting the Woodland Trust on your neighbourhood plan, we very much appreciate the opportunity to comment. Neighbourhood planning as an important mechanism for ensuring communities have an active role in protecting, restoring and planting trees and woods.</p> <p>It is great that you recognise the presence of ancient woodland in your parish. To provide clarity it would be useful if ancient woodland and notable trees could be mapped within your plan. For example for most types of development (ie residential) a planted buffer strip of 50m would be preferred to protect the core of the woodland. Standing Advice from Natural England and the Forestry Commission also has some useful information: https://www.gov.uk/guidance/ancient-woodland-and-veteran-trees-protection-surveys-licences	Accepted. The steering group recommended that a buffer zone would not necessarily be planted and that a strip of 25m is more reasonable. Amend Policy LE2 to include further criterion as suggested.	Amend NDP. (7.6)	All			Comment.	<p>Neighbourhood planning is a great opportunity to think about how trees can enhance your community and the lives of its residents. We welcome the references in <i>Policies LE1 and LE2</i> to enhancing tree cover and incorporating trees into new developments. This could include more specific asks, for example you could ask that each new house requires a new street tree, likewise car parks must have trees within them. You can also think about how trees can be used to reduce the impacts of flooding and air pollution in your community. Maybe they can enhance educational opportunities or enhance the visual amenity of an area. It is important to map your current trees and think about the benefits they bring. What happens when they reach the end of their natural life? Do you have succession planting plans in place? And do you have a replacement standard so that mature trees with large canopy are adequately compensated for? Our guidance document on</p>	<p>Noted.</p> <p>Policy LE1 already protects trees and hedgerows and requires replacement planting of trees. The settlements are very rural in character; provision of street trees may be inappropriate on rural access roads and new public car parks are unlikely to be provided over the plan period.</p>	No change.

There are Natural England and Forestry Commission standards which you can use to push developers on this: The Woodland Access Standard aspires - That no person should live more than 500m from at least one area of accessible woodland of no less than 2ha in size. - That there should also be at least one area of accessible woodland of no less than 20ha within 4km (8km round trip) of people's homes. I stopped spraying with these chemicals in my garden 24 years ago. The current practice of spraying gateways, verges and stubble fields before ploughing with chemicals is damaging the environment for shoddy short-term gain. The first colonisers after spraying are the rampant plant species such as nettles and docks - presumably the very species the farmer/industrialist want to destroy - and these plants are usually unpalatable to herbivores. I regularly walk past a recently 'nuked' margins of an arable field and all that is happening are grazers, such as rabbits, are moving into the sown crops – if a varied hedgerow had been left, this would not happen. This existing drainage system will not cope with the increased quantity and velocity of displaced water due to the extra areas of hardstanding and roofs outlined for the proposed new buildings in the plan. The fact that additional drainage is not being put in place in preparation for this, and indeed that the need for it is not even discussed, strikes me as just plain wrong.</p> <p>The severity of the problem is emphasized by the fact that the County Council has stored supplies of sandbags with at least 2 properties within the village centre for many years, and that approximately every 7 or 8 years I see neighbours dashing frantically to and fro clutching these bags in a state of panic, as very heavy rain happens quite expectedly here at long intervals. It is vital to note here that the total response on which these significant conclusions and recommendations are based was only 93 people of whom 5 abstained from giving an answer at all to this question. Therefore all percentage figures here are based on the responses of just 88 people – 15% of the Lyonshall electorate . In favour of Site A, for example, is therefore only 61 people (11% of the electorate) who may or may not be Lyonshall residents and may or may not have a vested interest! The “narrow majority in favour of more than 30 extra houses” (3.1.10) is a very curious interpretation of the figures. I assume it refers to Questions 2a and 2b where “more than 30” attracted 37 votes and “less than 30” attracted 36. Hardly conclusive! Because the Chairman of the new NDP Steering Group, who is also Chairman of the Parish Council, had already agreed 4 more sites and housing allocations on them totalling a further 43 houses with the local landowners concerned – all this BEFORE the “issues and Options Consultation” of July 2017 when, as previously noted, they were presented as a <i>fait accompli</i> to the parishioners! Well, obviously not because Lyonshall needed these extra 43 houses to make up the numbers to the HCC minimum – as previously stated, the HCC minimum was 36 and the “new developments and commitments” mentioned above total 68. The reasons hinted at in the July 2017 Consultation document are fatuous; they predicate the possibility that the houses already approved won't be built and, while suggesting that the extra 43 will somehow make a financial contribution to the village, carefully omit to mention any down side or risk to their inclusion.</p>

					It seems to me that this is a particularly telling example of the Chairman's stated wish to make the Lyonshall NDP easy for Herefordshire CC planners to use, NOT reflective of Lyonshall residents' opinion or even what can be demonstrated as necessary for the Parish. I assume that, should this Regulation 14 draft go through with all these additional sites included, it will be very difficult indeed for Lyonshall residents to object to building on them as per the NDP at a later stage.		
(14.12)	23	3.1	18,19		It is difficult to know why : a) the excellent Herefordshire Council report " Herefordshire Older People's Housing Strategy and Pathway" of May 2015 was not considered, even before the Lyonshall Housing Survey of January 2017 and certainly before publication of this Regulation 14 document. b) The Herefordshire Council's "Older People's Integrated Needs	Not accepted: These comments are inaccurate and factually the survey was analysed by the five members of the steering group. I haven't found them in any Draft NDP to date. These “lifetime communities” will exclude any older person who becomes frail, who is wheel-chair bound, who needs 24/7 care either from family or a live-in carer?? In a Parish which already has 27% over-65s and is likely to have 40% over-65s before the end of this NDP Planning Period (2031) it is highly unlikely that all these people (between 150 and 250) will remain fully fit and capable until the day they die. I would be more convinced if something had actually happened these past few years. There has been someone there these last few weeks, true, but the speed of operations is making glaciers look sprightly. If the village is to be a truly dynamic, internally coherent and carbon-appropriate living and working unit, not to mention a safe place in which to return from the pub if it ever gets finished, both these things should be classified as core transport imperatives. This means dedicated cycle tracks and vastly improved pavements.	Noted. See Table 1 Herefordshire Council Comments. Promoting access for walking and cycling have been added to Policies LH1 and LB1. 					<p>The number of new houses is already well ahead of those needed or required. There is no demonstration that the majority of Lyonshall owners support the big (and legally unnecessary) expansion of the village and what benefits this might bring. Indeed, one of the few arguments – that it will justify the reopening of The Royal George – is highly questionable (see below).</p> <p>Already it can be seen that the take-up of housing on new developments already approved isn't happening and they don't take into account integration with neighbouring long-established properties. The Burnt Orchard/ White Lion Meadow development, in particular, has been going on for a long time as a building site with only one house completed and occupied. If there was demand, surely this would have been long-since completed and sold? Building more luxury houses in isolation, without the necessary back-up infrastructure – nearby shops, nursery, pre-school and primary/ secondary schools (including 6th form), social facilities etc – will not encourage more younger people to move to and live in Lyonshall. Indeed, as with many villages, the drain of the young (those needing work and raising a family) and the very old (those needing specialist care) is likely to leave Lyonshall even more of a car-dependant, isolated community largely attractive only for the healthy retired 60 to 80 year olds.</p>

This gives a total figure of 61 new houses already built or committed in Lyonshall parish, exceeding the minimum indicative housing growth target for Lyonshall by 25 units. However, NDPs can plan for more housing than the minimum requirement”</i></p> <p>The plan does NOT demonstrate why there is a need to build more houses than the growth target. There appears to be no shortage of homes in the village at the moment and no excessive demand over supply. Indeed, it is arguable that the reverse is the case (there is more supply than demand). Building more homes where there is not the demand, is not the answer.</p>	<p>Not accepted.</p> <p>The NDP can plan for more development than that proposed in a local plan and this is a decision for the qualifying body (the Parish Council).</p> <p>The rationale for the additional housing provision is set out in the supporting text in the NDP and the approach is supported by many local residents, and Herefordshire Council (see Table 1).</p>	No change.

Not so much in Lyonshall, but where linear development has occurred along a main trunk road, you now have numerous examples where a village is effectively bisected, with two halves not able to integrate due to the constant heavy lorries and traffic thundering through a village divided into two and people (especially the young and the elderly) fearful of crossing into “the other half”.</p> <p>It defeats the argument about needing more houses to justify The Royal George, if people can’t quickly walk to it. (46.0)	All			Support	Thank you, NDP Steering Group, for all of your hard work. This draft plan is clear, well-written and easy for the rest of us to access and understand. It's hard to combine the sensitive (and interwoven) areas of agricultural changes, housing development, business and employment growth, transport functions and environmental requirements. It's even harder to do it while ensuring that the needs of the whole Lyonshall community are taken into account, including the provision of leisure facilities such as the pub and the Memorial Hall. 					The plan also tackles something that's very important to me personally, and to a lot of other residents - the way the parish looks and feels to live in. It seems that without an agreed NDP we're in danger of having intrusive, large-scale housing development forced on us by Herefordshire Council so that it can meet its goals. I'd rather that we, the Lyonshall community, made the decisions about the way we live. I therefore support this plan.

					<p>The Government, through Herefordshire Council needs to provide more homes and it tasked all parishes with a requirement to provide new homes to for the period 2011 to 2031. Lyonshall has already reached its target of planning approvals with committed allocations before the plan's completion.</p> <p>A Plan's aim is to be positive towards growth, look for and identify possible land allocation for development and offer some control of what is developed on it. The fact that the majority of parishioners, after consultation, would still like to see more development within the enlarged settlement boundary supports village sustainability and will help to protect local services and facilities in our parish as well as our neighbouring parishes. It may also help to promote further employment opportunities locally too.</p> <p>The plan clearly identifies house size and type within the wishes of the parishioner criteria. It is very</p>

					<p>hard to produce policies that conform with Herefordshire Local Strategy without the proposed development sites being filled with many homes. Lyonshall is a rural community where large housing estates would be detrimental to character.</p> <p>It is reassuring to see that local landowners are happy to restrict the number of houses on each site and I can appreciate that it would be difficult considering how many houses of size or type the owner believes would make a viable development. I hope that a mix of housing types and sizes to suit all; especially young locals or current parishioners wishing to downsize are options to be made available.</p> <p>It is good to see provision; should it arise; for a new Village Hall facility.</p> <p>Finally, the well-publicised parish consultations have given everyone an opportunity to offer their comments and make suggestions throughout the process.</p>

(54.1)	All			Support	Dear Clerk, I'm writing to express my support for the NDP as presently drafted. My particular comment concerns the Housing section 3.1. What's best for Lyonshall is difficult to predict. And even if one could make a decent stab at it, making a plan to get there would be more difficult still. So the process here has been:- <ul style="list-style-type: none"> ○ to listen to the parishioners, including those possessing the large 	Noted.	No change.

But the potential for dozens of new Lyonshall families, using the pub, supporting community activities and getting on and off the buses, should not be stifled.</p>

(1.2)			LH1	Comment	<p>To promote positive planning and to ensure conformity with the HCS, we submit the policy requires a further degree of flexibility.</p> <p>Gladman suggest a caveat to the policy, supporting that additional sites adjacent to the settlement boundary should be considered as appropriate to respond to future needs or a change in circumstances in the plan area.</p>	<p>Not accepted.</p> <p>The proposed sites have come forward through a thorough and extensive process of public consultation and their development would support a significant level of growth over the plan period over and above the minimum requirement set out in the Core Strategy.</p> <p>It would not be appropriate or necessary to support additional sites outside the</p>	No change.

						proposed settlement boundary.	
(1.3)			LH3	Comment	<p>Whilst Gladman support such a policy, we still regard it important that the policy recognises that planning policies should not be overly prescriptive and need flexibility in order for schemes to respond to site specifics and the character of the local area.</p> <p>There will not be a 'one size fits all' solution in relation to design and sites should be considered on a site by site basis with consideration to various design principles.</p> <p>Gladman therefore suggest more flexibility is provided in the policy wording to ensure high quality residential developments are not compromised by overly restrictive criteria. We suggest regard should be had to paragraph 60 of the previous NPPF which states that; <i>"Planning policies and decisions should not attempt to impose architectural styles or particular tastes and they should not stifle innovation, originality or initiative through unsubstantiated</i></p>	<p>Not accepted.</p> <p>The Policy wording has been broadly accepted by Herefordshire Council and some minor changes are proposed in response to residents' and stakeholders comments at Reg 14.</p> <p>The NDP will be submitted after 24th January and so the revised (2018) NPPF will be considered for the purposes of examining the plan against the basic conditions.</p>	No change.

(1.4)			LE1	Comment	<p>Draft Policy LE1 seeks to protect and enhance the character and appearance of the parish. As currently drafted criterion (5) of the policy seems to apply to all Heritage Assets and does not distinguish between designated and non-designated assets.</p> <p>Gladman suggest this aspect of the policy is amended to ensure it conforms with the previous Framework. Paragraph 132-134 of the previous Framework relate specifically to designated heritage assets and highlight that the more important the asset the greater the weight should be attached to it.</p> <p>The previous Framework states that if the harm to a designated heritage asset is deemed to be substantial then the proposal needs to achieve substantial public benefits to outweigh that harm. If the harm is less than substantial, then the harm should be weighed against the public benefits of the proposal. The policy needs to be clear on the two tests to be applied</p>	<p>Not accepted.</p> <p>As above the NDP will be tested against the revised NPPF. Historic England (see Table 2) are fully supportive of the NDP.</p>	No change.

With regards to non-designated heritage assets, the policy should refer explicitly to paragraph 135 of the Framework which states that a balanced judgement should be reached having regard to the scale of any harm and significance of the heritage asset.</p> <p>Moreover, Gladman suggest there is scope for a standalone heritage policy in the LNP. The introduction of a new policy with a focus exclusively on heritage assets would ensure the LNP remains a clear and concise document.</p>		
(1.5)	All			Comment	<p>Conclusions Gladman recognises the role of neighbourhood plans as a tool for local people to shape the development of their local community.
