9. Conclusion .....	9

## 1. Context

This paper aims to outline the background data that will be used to underpin the future rural settlement hierarchy of the Local Plan 2021-2041. This is the second fact check paper and follows the Place Shaping Consultation undertaken in June/July 2022.

At this stage no decisions have been made regarding how settlements will be ranked or scored. The previous consultation on the [Rural Settlement Hierarchy Background Paper June 2022](#) listed the settlements alongside a scoring system.

Following the recent Place Shaping Option consultation, a comprehensive and consistent review of all data has been undertaken based on the responses received. The purpose of this paper is to ascertain with the town and parish councils that the base data being used is correct, prior to any review of ranking and selection work continues.

316 settlements have been reviewed in total. Refinement has been undertaken to filter settlements which have no key services and have few supplementary services, this resulted in 164 settlements not being listed for the second stage of the hierarchy work. The second stage list now has a total of 150 settlements being considered for further analysis. This is explained further in Section 2 & 3 below.

The following data set themes included in this October 2022 Fact Check Survey include:

- Services and facilities
- Environmental assets and constraints
- Road infrastructure
- Public transport
- Employment sites

This evidence will help to inform the next stage of defining the settlement hierarchy which will set out how the strategic rural growth should be distributed across the county.

The data is presented by Housing Market Areas (HMAs), parish and by settlement. The county is divided up into seven housing market areas based on common housing characteristics including tenure, house type profile, incomes and affordability and house prices. It also reflects geographical proximity, patterns of household movement, (migration) and travel to work patterns. The most recent evidence for [Housing market area needs assessment July 2021](#) is available online. A map of the HMAs can be found in Appendix 1.

Each HMA will have a table relating to the following themes:

- Services and facilities
- Environmental assets and constraints
- Road infrastructure
- Public transport availability
- Employment sites

Data has been collected using various sources of research including information held by service providers, desk based mapping and previous consultations with Parish Councils these include:

- February 2020 - All parishes were contacted requesting the completion of a questionnaire indicating the local services and facilities in the parish. 90 parishes responded

- Pre-engagement questionnaire October 2021 to January 2022 – all parishes contacted. 52 parishes responded to this consultation.
- April 2022 – Fact check of level of services within settlements prior to Place Shaping Consultation. 55 parishes responded.
- The information from the above consultations subsequently fed into the Rural Settlement Background Paper June 2022.
- June /July 2022 - Place Shaping Consultation including Rural Settlement Hierarchy Background Paper.

The information has now been refined and collated. This targeted consultation to parish councils is seeking any further factual comments on the base data. The data will be used to formulate the next stage of the rural settlement hierarchy, therefore any updates will be required in order to inform the next stage of the draft Local Plan 2021-2041.

**Please can you review the following tables for your parish and indicate any amendments required by Friday 11<sup>th</sup> November 2022.**

This is a review of factual information rather than seeking opinions regarding the inclusion of any settlement within the future Local Plan.

There will be a future consultation regarding the settlement hierarchy options in Summer 2023.

To make a response to the consultation please respond by email to

**[neighbourhoodplanning@herefordshire.gov.uk](mailto:neighbourhoodplanning@herefordshire.gov.uk)**

## 2. Settlements for assessment

The Rural Settlement Background Paper June 2022 referred to a scoring system. However, before this scoring can be progressed, a further check of the data is necessary to ensure accurate information is used before any settlement hierarchy can be drafted.

The original settlement audit had over 300 settlements named, many of these would not feature in any future settlement hierarchy for the Local Plan, and therefore, the decision was made to refine the lists using a filtering process. Any settlement that did not contain any key services have been filtered out of the audit review process. This means that 164 settlements named in the June 2022 version of the report are no longer being assessed. Following this 1<sup>st</sup> filtering process, 150 settlements remain. This has meant that the following HMA areas now have the following settlements;

HMA	Settlements for further assessment	Removed as part of first filter
Bromyard	15	19
Golden Valley	18	9
Hereford	26	36
Kington	15	8
Ledbury	15	18
Leominster	22	33
Ross-on-Wye	39	41

This enables a more detailed analysis to be undertaken on those settlements that are more likely to feature in any future settlement hierarchy or planning policy.

The settlements that have been removed from those listed in June 2022 report as part of the first filter and can be seen in Appendix 7.

## 3. Services and facilities

All the 318 settlements listed in the [Rural Settlement Hierarchy Background Paper June 2022](#) have been subject to the initial filtering process.

Initial review of the available services and facilities have been based on the following:

- Services and facilities within the settlement boundaries as defined within existing NDPs
- Services and facilities within the built form of the settlement where an NDP does not exist
- Services and facilities within 1km of either of the above. As this is considered to be an acceptable distance to access a service based on the principles of 20 minute neighbourhoods. This can be measured from the edge of the settlement boundary or edge of the built form.

Therefore, the information provided concerning services and facilities at the wider parish level has not necessarily featured within the tables.

A number of settlements have been identified with no key services and with few other services overall.

Key services are defined in the June 2022 methodology as being the following:

- Primary schools,

- Secondary schools,
- Community/village halls,
- Talk Community Hubs,
- Doctor's surgeries,
- Pharmacies
- Shops.

These key services are still considered to add to the greater sustainability of a place, reducing the need to travel for daily services. Settlements with few or limited facilities with no key services are considered to be unsustainable locations for any future growth.

As part of the filtering process, these settlements have been removed from the reviewed list of settlements and a list of these can be found at Appendix 7.

A revised Service and Facilities table has been produced and this is available at Appendix 2.

### **Changes made since the June 2022 audit**

#### **a) Shops**

A comprehensive review of the classification of shops has been carried out and any changes made can be found in Appendix 8a.

For clarification:

- A village shop is considered to be one selling day to day goods
- A 'village shop with an associated service' is where the retail facility includes for example a post office
- 'Other key retail' includes a garden centre, farm shop, butchers, bakery, mobile post office

#### **b) Farm vending machines**

Following consultation feedback farm vending machines have been removed from being listed as shops.

#### **c) Tourism Accommodation and facilities**

Facilities such as hotels, B&Bs, self-catering accommodation, caravan parks, camping and glamping sites have been removed from the tables. These are not considered to be daily services for the local community although they do bring in economic benefits for the local economy.

## **4. Environmental Data**

The environmental table identifies three high level elements:

- Fluvial flood risk (flooding from rivers)
- Area of Outstanding Natural Beauty (AONB)
- Conservation Area

Other environmental assets and constraints will be taken into account at a later stage within the process.

The tables show area of the highest fluvial flood risk, this is known as flood zone 3 where [flood risk assessments](#) are concerned. It applies to land having a 1 in 100 or greater annual probability of river flooding. It also includes areas where the functional floodplain exists. This zone comprises land where water has to flow or be stored in times of flood.

- If flood risk is shown within the settlement or built form it is identified by a 'dot'.
- If it lies close to the village, it is identified as being 'on edge'.

All settlements in the [Areas of Outstanding Natural Beauty \(AONB\)](#) are identified by a 'dot'.

All settlements identified as having a [Conservation areas](#) are identified by a 'dot'.

Following the responses to the Place Shaping consultation as comprehensive review has taken place and any issues addressed. For full details of changes made to the environmental evidence base can be found in appendix 8b. In summary changes made to the environment data are:

- AONBs
  - 4 settlements now recorded as being within AONB
    - Priors Frome,
    - Ballingham,
    - Storridge and
    - Sellack.
- Conservation Areas-
  - 2 settlements amended,
    - Huntington corrected to no conservation area and
    - Wilton falling within the Ross Conservation Area.
- Flood Zone 3
  - 31 settlements have been amended following a review of current flooding data.

A breakdown of all amendments made to the environmental data base can be found in Appendix 8b.

Whilst reviewing the flood guidance and mapping from the Environmental Agency, there are no other additional changes to consider other than the corrections highlighted above. A Strategic Flood Risk Assessment is being undertaken as part of the Local Plan evidence base and it will be utilised during the selection stage. Thus seeking to avoid development in areas highlighted within the report as being at flooding risk.

With the sequential approach outlined within the Planning Policy Guidance August 2022 in mind, the settlements of Hampton Bishop and Eardisland have been removed in this assessment. As the entirety of the settlements falls within flood zone 3 they are not considered to be a suitable or sustainable area for development.

It should be noted that:

- Where flood zone 3 runs through a settlement it has been recorded as affected by flooding.
- If the flood zone only touches the edge of a settlement it is considered to be less affected but still identified as a risk.
- The extent of a settlement has been defined by existing settlement boundaries either through an NDP or where an NDP is not in existence by the extent of the existing built form.

The updated information regarding Environmental Data can be found in Appendix 3

## 5. Road infrastructure

The original report (June 2022), identified road classifications in four columns (A, B, C, or U road) and a score was attributed if the settlement was on an A or a B route.

It is acknowledged that the previous report did not outline the selection process with regard to road classifications within this scoring.

Therefore, this report is clarifying that approach.

The assessment columns have now been split into 2 main categories. These are:

- 'the class of road servicing the settlement' with supporting columns of A, B, C, and U roads and
- the 'proximity of the settlement (up to 1km by road) to an A or B road' - This gives a useful indicator of general accessibility and connectivity of the settlement to its wider hinterland.

This has been based on the following:

- Roads that run directly through the settlements as defined by the settlement boundary with an NDP or by the built form where an NDP is not in existence.
- Proximity of A and B roads have been based on within 1 Km of the above
- Major roads running adjacent to the built form or settlement boundary are considered as in 'proximity to the settlement'

These revised tables can be seen in Appendix 5.

## 6. Drainage

Further discussions have taken place with statutory consultees Severn Trent and Welsh Water (August 2022). The conclusion of those discussions were:

- drainage is difficult to assess comprehensively on a strategic level,
- there are too many variables within a settlement, drainage may be available to some areas but not others
- data can be dependent on specific connections and these may change frequently
- capacity varies over time, so it is hard to judge as a snapshot in time
- the presence of drainage within a settlement is not a guarantee of a connection, this is dependent on size and locations of schemes coming forward.

Due to the complexity and variability of drainage, a decision has been made to remove drainage from the rural settlement hierarchy assessment. An assessment of drainage will be included within a site by site analysis of any future allocations.

A policy to guide development with regard to drainage will be taken forward as part of the Local Plan.

## 7. Public Transport

Working with colleagues in Public Transportation these tables set out the frequency of services in the settlements and parishes. Tables can be found at Appendix 4.

There are five major categories in this table:

- Bus route with at least six return journeys a day (Monday - Saturday) including am/pm commuter journeys

- Bus route with five return journeys a day or fewer (Monday - Saturday) including am/pm commuter journeys
- Bus route with five return journeys a day or fewer (Monday - Saturday), not am and pm commuter journeys
- Market Day services operating only on certain days of the week
- No bus routes

The relevant bus services route numbers are identified.

Following further consultation with Transportation, there are no changes to the data as set out in the Rural Settlement Hierarchy Background Paper June 2022.

## 8. Employment

Details on employment sites around the county were taken from the Employment Land Review (2012), which was undertaken as part of the evidence base for the Core Strategy, these will be updated once the revised employment land study is published.

Only the employment sites that have been identified as part of the employment study have been assessed and included in the matrix.

Employment sites within a close proximity to the settlements have been identified and the distance to these as the 'crow flies' has been worked out at both

- up to 1km distance of a settlement and
- 1km to 5km of a settlement.

These are considered to be appropriate distances when travelling such distances by walking, cycling or in a vehicle.

This data has not changed since the June 2022 report. Clarity about how the data has been assessed has been added and it does not refer to travel by road distance due the numerous possible routes of travel.

Tables can be found in Appendix 6.

## 9. Conclusion

The above amendments have helped to clarify, refine and amend any issues and feedback from consultations. The report has given more clarity on the location of the services in relation to the settlements.

This data will be used to revise the settlement scoring and eventual settlement hierarchy to inform the rural growth strategy for the Local Plan 2021-2041.
